- (d) a certificate certifying that electrical products of the class (being a class to which section 6(1) of the Act does not apply) are suitable for connection to an electricity transmission or distribution network (a **suitability certificate**).

(2) An application under this regulation—

- (a) must be accompanied by—

- (i) in the case of an application for a safety labelling certificate—
    - (A) a written report in the English language from a body approved by the Technical Regulator for the purpose detailing tests and inspections conducted by the body in accordance with the applicable safety and performance standard for the purposes of determining whether that standard is complied with in respect of the electrical product and the results obtained; and
    - (B) a sample of the electrical product (or a sample length of 1 metre if the electrical product is a flexible cord); and
  - (ii) in the case of an application for a performance registration certificate—a written report in the English language from a body approved by the Technical Regulator for the purpose detailing tests and inspections conducted by the body in accordance with the applicable energy performance standard for the purposes of determining whether that standard is complied with in respect of the electrical product and the results obtained; and

- (b) must be accompanied by certification (in the form required by the Technical Regulator) that the electrical products form a regular line of manufacture and that each electrical product in the line accords with the sample.

(3) The Technical Regulator may require the applicant to provide further information or reports, or a further sample of the electrical product, for the purposes of determining the application.

(4) The Technical Regulator may exempt an applicant from a requirement of subregulation (2)(a)—

- (a) if a comparable certificate has previously been granted to another person in relation to the electrical product; or
- (b) if the electrical product is a modified version of an electrical product for which a comparable certificate has previously been granted; or
- (c) if satisfied that the electrical product has been tested and inspected in accordance with, and complies with, an international or other standard that provides protections that are at least equivalent to those provided by the safety and performance standard, energy performance standard or other standard concerned; or

(d) in any other circumstances that the Technical Regulator considers appropriate.

(5) A safety labelling, performance registration or suitability certificate will not be issued unless the Technical Regulator is satisfied that the safety and performance standard, energy performance standard or other standard concerned is complied with in respect of the electrical product.

(6) An efficiency labelling certificate will not be issued unless the Technical Regulator is satisfied that the energy efficiency of the product as indicated on the label in relation to which authority is sought has been determined in accordance with the applicable energy efficiency labelling standard and that the label complies with that standard.

#### **Labelling under safety labelling certificate**

6. A safety labelling certificate authorises the holder of the certificate, or a person acting on behalf of that holder, to label an electrical product of a kind specified in the certificate as follows:

- (a) the electrical product may be labelled—
  - (i) with the labelling code specified in the certificate for the purpose; or

- (b) the RCM may only be used if the requirements of AS/NZS 4417 are complied with;
- (c) subject to paragraph (d), the required labelling must appear in a conspicuous place on the exterior of the electrical product;
- (d) the certificate may authorise the required labelling to appear on a container in which the electrical product is sold or elsewhere if it is not practicable for it to appear on the electrical product.

#### **Labelling under efficiency labelling certificate**

7. An efficiency labelling certificate authorises the holder of the certificate, or a person acting on behalf of the holder, to affix a label of a kind specified in the certificate to an electrical product of a kind specified in the certificate in accordance with the applicable energy efficiency labelling standard.

#### **Duration and renewal of certificates**

8. (1) A certificate remains in force for a period of 5 years from the date on which it is issued.

(2) The Technical Regulator may, on the application of the holder of a certificate before expiry of a period for which the certificate is in force, renew the certificate for successive periods of 5 years.

#### **Transfer of certificates**

9. The holder of a certificate may apply to the Technical Regulator to transfer the certificate to another person (and, if the application is granted, the Technical Regulator will vary the certificate accordingly).

**Variation of certificates**

**10.** The holder of a certificate may apply to the Technical Regulator to vary the certificate as necessary to accommodate—

- (a) a modification of the electrical product that does not, in the opinion of the Technical Regulator, significantly affect any characteristic of the electrical product relevant to the determination of the original application for the certificate; or
- (b) a variation in the brand, model or other designation of the electrical product.

**Cancellation of certificates**

**11.** (1) The Technical Regulator may cancel a certificate by written notice to the person to whom it was issued—

- (a) if the Technical Regulator has, under section 8 of the Act, prohibited the sale or use (or both sale and use) of electrical products to which the certificate relates; or
- (b) if the Technical Regulator is satisfied that the terms of the certificate or these regulations have not been or are not being complied with.

(2) The Technical Regulator must, before cancelling a certificate, give the person to whom the certificate was issued a reasonable opportunity to show cause why the certificate should not be cancelled.

(3) A person must, within 21 days after receiving a notice under subregulation (1), return the certificate to which the notice relates to the Technical Regulator.

Maximum penalty: \$1 000.

Expiation fee: \$150.

**Register of certificates**

**12.** (1) The Technical Regulator will keep a register of certificates.

(2) The register will include the following information in relation to each certificate:

- (a) the name and address of the holder of the certificate; and
- (b) a description of the electrical product to which the certificate relates; and
- (c) the number of the certificate; and
- (d) in the case of a safety labelling certificate—
  - (i) the labelling code specified in the certificate; and
  - (ii) if the certificate authorises the use of a specified registered trademark—the registered trademark; and
  - (iii) if the certificate authorises the labelling to appear on a container in which the electrical product is sold or elsewhere—details of that authorisation; and
  - (iv) if the Technical Regulator has been notified that the holder intends to label the electrical product with the RCM—details of the notification; and
- (e) in the case of an efficiency labelling certificate—details of the label to which the certificate relates.

(3) The register will be available for inspection by members of the public during ordinary business hours on payment of a fee fixed by the Technical Regulator.

#### **Notification of change of name or address**

**13.** If there is any change in the name or address of the holder of a certificate, the holder must, within 21 days after that change, notify the Technical Regulator in writing of the new name or address (as the case requires).

Maximum penalty: \$1 000.

Expiation fee: \$150.

#### **Disposal of samples**

**14.** (1) An applicant who provides the Technical Regulator with an electrical product as a sample under these regulations must make arrangements (acceptable to the Technical Regulator) for the disposal of the electrical product within 28 days after notice in writing to do so by the Technical Regulator.

(2) If an electrical product is not disposed of as required by subregulation (1), the Technical Regulator may arrange for its disposal and recover the cost of doing so from the applicant.

#### **Testing of electrical products**

**15.** (1) The Technical Regulator may, at any time, cause tests to be carried out on an electrical product to which section 6(1), (2) or (3) of the Act applies that is offered or exposed for sale by a trader.

(2) If an electrical product tested under subregulation (1)—

(a) does not conform with an applicable safety and performance standard or an applicable energy performance standard; or

(b) does not conform with the information as to its energy efficiency contained in a label affixed to the electrical product,

the Technical Regulator may (by application in proceedings for an offence against the Act or these regulations or by action in a court of competent jurisdiction) recover from the trader by whom the electrical product was offered or exposed for sale the costs incurred in purchasing the electrical product and having it tested.

#### **General requirement for applications**

**16.** An application under these regulations must be made in the manner and form required by the Technical Regulator.

#### **Fees**

**17.** (1) The Technical Regulator may fix fees payable in relation to an application under these regulations or the issue, renewal, transfer or variation of a certificate under these regulations or the provision of a replacement copy of such a certificate.

(2) The Technical Regulator may refuse to accept an application or to issue, renew, transfer, vary or provide a replacement copy of a certificate if the appropriate fee is not paid.

(3) The Technical Regulator may waive or refund the whole or part of a fee payable under these regulations.

- reduce the number of existing zones from 25 to 17;
- rewrite and update all zone objectives and principles, with the exception of those applying to the Wirrina Cove Zone, the Historic (Conservation) Randalsea Zone and the Historic (Conservation) Rapid Bay Zone;
- introduce lists of complying developments to most zones, to provide a greater degree of certainty for applicants;
- introduce lists of Category 1 and Category 2 developments to clarify public notification procedures for certain kinds of development;
- substantially maintain the position of the Residential Zone boundary around Carrickalinga, with minor amendments only to reflect land division approvals at the edge of the zone;
- introduce a Tourist Accommodation Zone over the Latvian Camp, the Christian Revival Camp, Beachside Caravan Park and High Country Trails Horse Riding School at Normanville, and create a new Tourist Accommodation Zone at Normanville to accommodate existing tourist accommodation facilities, and to provide for the further development of such facilities;
- introduce new standards for residential development, for inclusion in a common Residential Zone, the content of which is based on the Good Residential Design, SA Planning Bulletin;
- provide for the establishment of a linear park along the River Bungala, linking Yankalilla and Normanville townships by inclusion of this land into a Recreation Zone;
- replace the Commercial Zone applying to the south-eastern end of Yankalilla township with a slightly larger Industry/Commercial Zone, the provisions of which are based on the Industrial Development Planning Bulletin;
- delete the Residential (Golf Course) Zone currently applicable to The Links Lady Bay Golf Course Estate, and add the relevant provisions of this zone to the Residential Zone which will then apply to The Links Lady Bay, Yankalilla, Carrickalinga, Normanville, Cape Jervis and part of Second Valley;
- delete the Extractive Industry (Deferred) Zone in its entirety, and the Extractive Industry Zone, with the exception of the zone which applies to the existing quarry at Rapid Bay;
- absorb the relevant provisions of the Urban Coastal Zone at Rapid Bay into a single Coastal Zone;
- delete the Urban (Deferred) Zone, currently applicable to land at Normanville and Cape Jervis, and replace it with a Recreation Zone and a Residential Zone, respectively;

- delete the Residential (Randalsea) Zone and replace it with a Residential Zone;
- amend the boundaries of the Randalsea (Historic) Conservation Zone and the Rapid Bay (Historic) Conservation Zone; and
- introduce a Recreation, Residential and Industry/Commercial Zone to the settlement of Cape Jervis, in place of the Country Township and the Urban (Deferred) Zone.

The Plan Amendment does not propose to substantially change the zone boundaries around the towns and settlements, other than as follows:

- north of Normanville township, between the sand dunes and Carrickalinga Road, the Urban (Deferred) Zone is to be replaced with a Recreation Zone;
- south of Normanville township between Hay Flat Road and Willis Drive, Part Section 1013 is to be rezoned to Residential in order to facilitate infill urban development between the township proper and The Links Lady Bay residential estate; at Cape Jervis, the Urban (Deferred) Zone on the eastern side of the town is to be subsumed into the Residential Zone which will then apply across the residential areas of this township;
- at Second Valley, three parcels of land on the western side of the settlement are to be added to the Country Township Zone, and on the eastern side of the township the Country Living Zone is to be replaced with a Rural Living Zone;
- at Randalsea, the Historic (Conservation) Zone boundary is to be reduced in size to exclude the surrounding hillsides, which are to be subsumed into the Primary Industry Zone;
- at Myponga Beach, the Country Township Zone is to be expanded to accommodate the group of sixteen shacks on Crown land which have been freeholded in accordance with recommendations put to Government by the Shack Site Freeholding Committee; and
- at Myponga the Country Township Zone is to be expanded only to accommodate a group of seven dwellings in Eats Street, all of which are connected to the town's sewerage system, and form part of the township proper.
