5. The construction of the processing areas (windrowing and final product), wheel wash bay area and surface water storage area shall be to the specifications listed in the 'Environmental Management Plan for a Recycled Organics Resource Centre at Buckland Park, dated 6 August 2003, Revision 1'.

6. Construction of all stages for the windrowing areas and wastewater areas shall be to Level 1 Supervision as set out in Australian Standard 3798-1996. Daily logs and the final supervision report shall be forwarded to the Environment Protection Authority.

13. The proponent must install a meteorological monitoring station in accordance with 'Meteorological Monitoring Guidance for Regulatory Modelling Applications, US EPA, February 2000', and be operational before operations at the site commence. It shall be to such a standard that it produces data suitable for air pollution modelling and complaint resolution. Note: The parameters that should be recorded are wind speed and direction at 10 m height, standard deviation of wind direction, temperature at both 2 m and 10 m heights, solar radiation and rainfall.

Unless varied by the following conditions:

16. The compost material containing plastics, currently located at the Jeffries Wingfield facility shall be allowed to be stockpiled adjacent to the proposed Primary Processing Building at the Jeffries Buckland Park site to enable future processing with the Hurrikan to remove the plastic and other contaminants prior to use on the site in future mound construction.

17. A topsoil cover of a minimum of 300 mm shall be maintained over the stockpile to ensure there is no litter.

18. The 'Calgrit 50' and 'Grit' shall be maintained at a moisture content that will minimise the potential for generation of dust at stockpile areas, during stockpiling, construction and operation of the windrows.

19. The water quality in the surface water storage ponds shall be monitored in accordance with the relevant provisions of the Environmental Management Plan.

20. The surface and side slopes of the 'Calgrit 50' and 'Grit' capping layer and the surface water drainage system shall be inspected on a monthly basis and after prolonged rain to ensure their integrity, and shall be maintained to ensure effective operation.

NOTES:

1. The proponent has an obligation under the Aboriginal Heritage Act 1988, whereby any 'clearance' work, which may require permission to disturb, damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs, according to section 23 of the Aboriginal Heritage Act 1988.

2. An environmental authorisation granted by the Environment Protection Authority will include conditions requiring compliance with the standards of site preparation, management and maintenance detailed in the Environmental Management Plan, dated 6 August 2003 and the following requirements:

- The monitoring of the separation distance between ground-water and underside of the clay liner. Measures will be required to be put in place to ensure corrective actions being activated prior to the separation distance being at, or less than 1.00 m. It is proposed to set a trigger level at 1.10 m separation distance for more frequent level monitoring (minimum daily) and a second one at 1.05 m separation distance to activate corrective actions. The Environment Protection Authority licence condition will require water levels to be measured weekly and assessed and reported monthly to the Environment Protection Authority for the first year of operation.
- The maintenance of all drains and ponds.
- The specific nature and quantities of wastes to be composted on the site, including composting trials.

3. The Minister has a specific power to require testing, monitoring and auditing under section 48 (c) of the Development Act 1993.

NOTICE is hereby given that the Mid Murray Council and the Regional Council of Goyder have prepared a draft Plan Amendment Report to amend the Mid Murray Development Plan and the Goyder (RC) Development Plan.

The Plan Amendment Report will amend the Development Plans by introducing a new 'Enterprise Zone' to specifically provide for the development of intensive agricultural industries and other compatible industries within a streamlined planning process that aims to provide greater certainty to developers and the general community.

The area affected by the proposed new Enterprise Zone is approximately 35 km east to west and 15 km north to south along the Morgan-Whyalla Pipeline. Robertstown and Eudunda lie to the west and south-west of the subject area, approximately 12 km and 20 km respectively, from the edge of the proposed zone. Morgan is approximately 15 km to the east of the proposed zone boundary. The subject land is located within the Hundreds of Bower, Bunday, Maude and Beatty.

The draft Plan Amendment Report will be available for public inspection during normal office hours at the Mid Murray Council Offices; 49 Adelaide Road, Mannum; Main Street, Cambrai; and 10 Fourth Street, Morgan; and the Goyder Council Offices; 1 Market Square, Burra; and 25 Bruce Street, Eudunda, from 13 April 2004 to 14 June 2004.
