DEVELOPMENT ACT 1993: SECTION 48

DECISION BY HER EXCELLENCY THE GOVERNOR

Preamble

1. A proposal to develop a Wine Bottling and Storage Facility in the Barossa Valley, near Nurioopta, to initially cater for approximately 5 to 6 million cases of packaged wines per year in Stage 1 of the proposal, up to approximately 20 million cases at the completion of Stage 2 of the proposal, has been under consideration as a Major Development under Division 2 of Part 4 of the Development Act 1993.

2. The proposal has been the subject of a Development Report and an Assessment Report under sections 46 and 46D of the Development Act 1993, and is hereafter referred to as the 'proposed Major Development'.

3. The proposed Major Development was the subject of a development application lodged on 3 December 2003 by Nolan Rumsby Planners (for Beringer Blass Wine Estates), but has been amended and expanded upon by the applicant's Development Report, dated May 2004; the applicant's Response to Submissions, dated July 2004; and certain correspondence between 19 August and 31 August 2004 (and accompanying plans), which is referred to below in the Conditions.

4. I am satisfied that an appropriate Development Report and an Assessment Report have been prepared in relation to the proposed Major Development, in accordance with sections 46 and 46D, Division 2 of Part 4 of the Development Act 1993, and have, in considering the application, had regard to all relevant matters under section 48 (5) of the Development Act 1993.

Decision

PURSUANT to section 48 of the Development Act 1993 and with the advice and consent of the Executive Council, and having due regard to the matters set out in section 48 (5) and all other relevant matters, I:

- (d) specify, for the purposes of section 48 (11) (b) of the Development Act 1993, the period of two years from the date hereof, as the time within which substantial work must be commenced on site, failing which I may cancel this authorisation.

2. The applicant shall submit further information and application(s) in relation to the matters that have been reserved for further decision-making.

3. No works on any part of the proposed Major Development shall commence until a favourable decision has been notified to the applicant by me or my delegate in respect of the reserved matter referred to in subparagraph (ii) in paragraph (b) of the Decision section above (refer also to Condition 7).

4. No construction activities or building works shall commence until a heritage survey has been completed to identify any Aboriginal Sites, Objects or Remains in the site area, and monitoring shall be undertaken during construction to enable the development to proceed without a breach of the Aboriginal Heritage Act 1988. Details of the applicant's Heritage Agreement and consultation with the Ngadjuri Heritage Association shall also be provided to the Development Assessment Commission and the Department of Aboriginal Affairs and Reconciliation prior to construction commencing.

5. Subject to conditions 3, 4, and 7, the applicant may stage building works, and, if so, may commence an approved stage before receiving my decision concerning building rules compliance for other stages (refer reserved matter (i) in paragraph (b) of the Decision section above). No building works shall commence on a stage of the development, however, until a favourable decision in relation to building rules compliance in respect of that stage has been notified in writing to the applicant by me or my delegate.

6. A decision on building rules compliance will only be made after a Building Rules assessment and certification has been undertaken and issued by the Barossa Council, or a private certifier, in accordance with the provisions of the Development Act 1993, and after the Minister for Urban Development and Planning receives a copy of all relevant certification documentation, as outlined in Regulation 64 of the Development Regulations 1993 (refer to 'Notes to Applicant' below for further information).

7. Before seeking my or my delegate's decision in respect of the matters reserved at paragraph (b) (ii) of the Decision section, the applicant shall finalise and lodge a consolidated 'Environmental Management and Monitoring Plan' (EMMP) which shall meet the reasonable satisfaction of the Environment Protection Authority. The EMMP shall cover stages of pre-construction, construction and operational phases of the proposed Major Development and shall consolidate the applicant's previously submitted draft Construction Management Plan, Environmental Management Plan, Irrigation Management Plan, Environmental Monitoring Plan and Waste Management Plan. The matters to be addressed in the consolidated EMMP shall include, but shall not be limited to, the management, mitigation, monitoring, and corrective actions/contingency plans of the following matters during each of these phases:

- dust and sediment control;
- odour emissions;

- surface and ground water management;
- wastewater treatment and re-use (including irrigation);
- waste management and overall site clean up;
- chemical, oil, construction-related hazardous substances and fuel use and storage, and management/emergency response plans. Areas containing materials such as fuels and chemicals that have the potential to contaminate stormwater must be adequately bunded. (This requirement would be satisfied by compliance with Australian Standards (AS3780.8) for storage tank and bund design and EPA 'Bunding and Spill Management Guidelines, January 2004');
- noise emissions (including the recommendation by the EPA for the applicant to conduct an ongoing noise assessment and monitoring program to ascertain the effectiveness of noise control measures);
- Aboriginal Heritage requirements in accordance with commitments by the applicant and Heritage Agreement;
- visual impacts (including lighting);
- traffic management strategies during construction and operation;
- site security, fencing and safety and management of impacts on local amenity for residents, traffic and adjacent land users;
- periods and hours of construction and operation in accordance with EPA requirements;
- community complaints register regarding the above matters.

8. The wastewater collection and treatment system shall be designed to ensure that the general obligations of the Environment Protection (Water Quality) Policy 2003 are met, and to ensure that effluent does not overflow or escape from drains, pipes, sumps, tanks, storage/treatment basins into any watercourse, or into stormwater drains which do not drain into the effluent collection, treatment and disposal system, except where the effluent complies with criteria in the above Policy.

9. In accordance with commitments by the applicant, wastewater shall not be stored in open storage ponds until it is first treated to reduce the potential for odours to occur.

10. The applicant shall ensure that stormwater, which does not comply with the Environment Protection (Water Quality) Policy 2003 criteria, is not discharged from the site without prior effective treatment.

11. Noise generated from the development shall not exceed:

- (a) 52 dB (A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) 45 dB (A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (c) a short term typical maximum noise level of 60 dB (A) when measured at the nearest existing residential property.

12. The proponent shall, subject to obtaining the landowner's consent in relation thereto, install, operate and maintain frost fans on the property located north of the proposed development site either in accordance with the recommendations of the Acoustic Report in the Development Report and in accordance with the Environment Protection Authority's standards for their operation, siting and distance from potential receptors, or in accordance with any alternative arrangement negotiated with the landowner. If the landowner refuses consent, however, the proponent is excused from compliance with this condition.

13. Landscaping of the site shall commence prior to construction of the proposed Major Development, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased.

14. In accordance with commitments by the applicant, buildings walls up to 3 m shall be clad in colorbond 'ironstone' (or similar), and walls above 3 m be clad in 'paperbark' colour colorbond (or similar).

15. All lighting must be directed and shielded in such a way as to prevent glare from the site, and any lighting that is not in use for operational or security reasons must be switched off.

16. In accordance with EPA recommendations, no trucks or heavy vehicles shall access the site from the portion of Light Pass Road, south of the access point for the proposed Major Development.

NOTES TO APPLICANT

- Pursuant to Development Regulation 64, the applicant is advised that the Barossa Council or private certifier conducting a Building Rules assessment must:

- (a) provide to the Minister a certification in the form set out in Schedule 12A of the Development Regulations 1993 in relation to the building works in question; and
- (b) to the extent that may be relevant and appropriate:
 - (i) issue a Schedule of Essential Safety Provisions under Division 4 of Part 12;
 - (ii) assign a classification of the building under these regulations; and
 - (iii) ensure that the appropriate levy has been paid under the Construction Industry Training Fund 1993.

Regulation 64 of the Development Regulations 1993 provides further information about the type and quantity of all Building Rules certification documentation for Major Developments required for referral to the Minister for Urban Development and Planning.

- The Barossa Council or private certifier undertaking Building Rules assessments must ensure that the assessment and certification are consistent with this provisional development authorisation (including any Conditions or Notes that apply in relation to this provisional development authorisation).
- Should the applicant wish to vary the Major Development or any of the components of the Major Development, an application may be submitted, provided that the development application variation remains within the ambit of the Development Report and Assessment Report referred to in this provisional development authorisation. If an application variation involves substantial changes to the proposal, pursuant to section 47 of the Development Act 1993, the applicant may be required to prepare an amended Development Report for public inspection and purchase. An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to section 48 of the Development Act 1993.
- It is recommended that the applicant finalise the required water licence arrangements pursuant to the Water Resources Act 1997, for the construction of the proposed water storage dam and subsequent reuse of water, prior to construction of the proposed Major Development (in order for operations to proceed). The applicant is also advised to submit information on the water licence arrangements to Planning SA, together with final details on the design of the stormwater dam and associated release mechanism(s) and infrastructure.
- The proponent is advised of the General Environmental Duty under section 25 of the Environment Protection Act 1993, which requires that a person must not undertake any activity, which pollutes, or may pollute; without taking all reasonable and practical measures to prevent or minimise harm to the environment.
- The applicant's EMMP should be prepared taking into consideration, and with explicit reference to, relevant EPA policies and guideline documents, including, but not limited to: the Environment Protection (Air Quality) Policy 1994, the Environment Protection (Water Quality) Policy 2003, the Occupational Health and Safety Regulations, EPA Guidelines on Odour Assessment, using odour source modelling 2003, EPA Handbook for Pollution Avoidance

on Commercial and Residential Building Sites 2004, and the EPA Stormwater Pollution Prevention Code of Practice for the Building and Construction Industry, in addition to other legislative requirements and Guidelines/Australian Standards requiring compliance.

- The applicant is reminded of its obligations under the Aboriginal Heritage Act 1988, whereby any 'clearance' work, which may require permission to disturb, damage or destroy Aboriginal Sites, must be undertaken with the full authorisation of the Minister for Aboriginal Affairs and Reconciliation, according to section 23 of the Aboriginal Heritage Act 1988.
- It is recommended that the applicant ensure there are measures in place to promote staff vehicle access to the site from the northern end of Light Pass Road.
- The applicant is advised that a further development application and authorisation will be required pursuant to Part 4, Division 2 of the Development Act 1993, for the following matters:
 - prior to commencement of Stage 2, if the applicant proposes to treat wastewater at the existing Wolf Blass winery wastewater treatment system;
 - for the establishment of any additional frost fans that may be required as part of Stage 2;
 - if the external advertising signage is amended from that indicated in the Development Report, or additional advertising signage is proposed.
- The Minister has a specific power to require testing, monitoring and auditing under section 48C of the Development Act 1993.

Given under my hand at Adelaide, 23 September 2004.

SPECIAL CONDITIONS

Land Access

A large portion of the gazetted area lies within the Innamincka Regional Reserve. This is a reserve classification proclaimed in 1987 under the National Parks and Wildlife Act 1972 that specifically accommodates multiple land use. Specific management zones exist in the reserve to reflect specific conservation protection measures. The Statements of Environmental Objectives developed will meet the requirements of these management zones.

A PEL application incorporating any portion of the Innamincka Regional Reserve will be referred to the Minister for Environment and Conservation and the views of such Minister are required to be taken into account when granting the PEL. In the case of petroleum production licences within the Innamincka Regional Reserve, approval must be obtained from the Minister for Environment and Conservation. Failing such Minister's approval, the issue is referred to the Governor for decision.

Licence Term

The PEL will be offered for a five-year term with a right of renewal for a further five-year term at the end of the initial five-year term, with a non-negotiable relinquishment of 50% of initial area at renewal.

Native Title

The PEL cannot be granted until the Right to Negotiate process pursuant to the Commonwealth Native Title Act 1993 has been concluded with any relevant registered native title claimants. It may be necessary to access adjoining accessible areas to conduct regulated activities relative to the PEL. The Right to Negotiate process will include negotiation for facilitation of appropriate access to such adjacent accessible areas reasonably necessary to conduct such regulated activities, and will also include negotiation for facilitation of access relative to the grant of any ensuing licence for future production and necessary infrastructure development.

Security

A minimum \$50 000 security (amount subject to review) will be required to be lodged by the licensee prior to entering the guaranteed licence term in which seismic or well activities are planned.

Applications

Applications lodged under Section 65 (1) of the Petroleum Act 2000 are required to be made in the approved form as identified in a Petroleum Exploration Data Package (can be ordered from: www.petroleum.pir.sa.gov.au or the Director Petroleum at the address below).

Applications

- must satisfy the requirements of Regulation 4 of the Regulations under the Petroleum Act 2000;
- must be accompanied by a proposed work program for the first 5 year term of the licence;
- must be accompanied by a statement of the financial and technical resources available to the applicant; and
- must be accompanied by the scheduled application fee.

Applications, together with relevant data should be submitted in the following manner to the Director Petroleum, Minerals and Energy Division, Department of Primary Industries and Resources SA, Level 7, 101 Grenfell Street, Adelaide, S.A. 5000.

Applications close at 4 p.m. on Thursday, 28 July 2005 (Australian Central Standard Time).

The following special instructions should be observed:

- The application and supporting data, together with the then scheduled application fee (currently \$2 736 for each application but likely to increase from 1 July 2005) payable to the Department of Primary Industries and Resources, enclosed in an envelope or package.
- The application should then be sealed and clearly marked as 'Application for Area CO 2004-A—Commercial-in-Confidence'.
- This envelope or package should then be enclosed in a plain covering envelope or package and delivered by hand or posted to the address above.

Copies of the basic exploration data pertaining to the areas comprising this notice may be obtained from the Petroleum Group of the Department of Primary Industries and Resources SA. Enquiries may be directed to the Director Petroleum (Telephone (08) 8463 3200; email: Goldstein.Barry@saugov.sa.gov.au).

Criteria for Assessment of Applications

The winning bidder will be selected on the basis of the total five-year work program bid. The work program must include a statement of exploratory operations the applicant proposes to carry out in each year of the first five-year licence term. It is expected that at least one petroleum exploration well would be included in the program.

Bids will be assessed taking account of the criteria listed below. It is important to note that the timing of well drilling and seismic acquisition will be taken into account. The most important criteria for assessment of CO 2004-A work programs are:

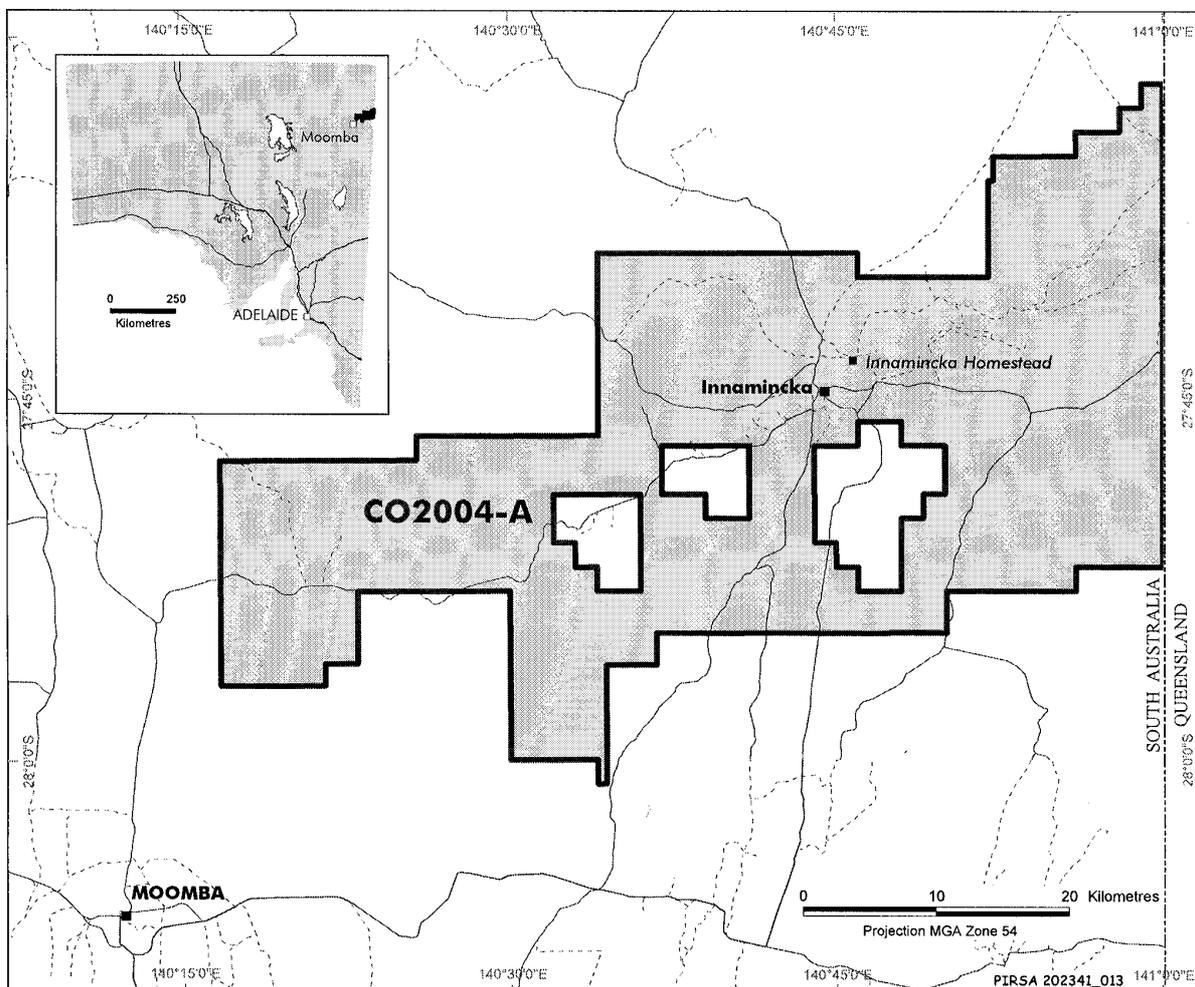

- the number of exploration wells to be drilled, their timing and anticipated targets (Eromanga, Cooper and Warburton Basins);
- the extent to which proposed wells are supported by seismic data;
- the number of years the applicant is prepared to guarantee the program;
- adequacy of financial resources and technical expertise available to the applicant; and
- the applicant's past performance in fulfilling work program commitments elsewhere in Australia.

Secondary criteria that may be taken into account are:

- the amount and nature of seismic surveying to be carried out and its timing; and
- other data acquisition and seismic reprocessing to be carried out.

In addition to the above criteria, where bids are similar, the benefits of the introduction of new explorers into the area (including intention with regard to establishing an office in South Australia) may be taken into account. In the case of cascading bids (i.e. multiple or hybrid bids by one applicant or joint venture), only the highest bid will be considered.

The Minister will announce the winning bidder, together with details of the work program.

Dated 21 September 2004.
