SOUTH AUSTRALIA
GAMING MACHINES ACT 1992

SECTION 86A

Gaming Machine Licensing Guidelines

[2 November 2005]

THE Independent Gambling Authority issues the following guidelines:

1. Purpose

The purpose of these guidelines is, without limiting the scope of the enquiries or actions which might be taken by the Liquor and Gambling Commissioner, to promote the intent of section 15 (5) of the Gaming Machines Act 1992 that the process of granting gaming machine licences have appropriate regard to the likely social effect the grant of a proposed licence might have on the local community and, in particular, the likely effect of problem gambling within the local community.

2. Application contents

(1) Prior to completing an application, the applicant should have:

- (a) consulted with the relevant local government council;
- (b) consulted with funded gambling rehabilitation providers likely to provide services to the people of the locality of the proposed licensed premises.

(2) Applications should include:

- (a) a demographic and social profile of the locality¹ of the proposed licensed premises;
- (b) the business plan² for the proposed gaming business, accompanied by an explanation of how the demographic and social profile of the anticipated patron group relates to the profile of the locality;
- (c) an explanation of the proposed premises design, including any features designed to assist in monitoring for problem gambling behaviour and for barred persons;
- (d) details of the consultations with local government and gambling rehabilitation providers, including their suggestions and feedback, and how those matters have been taken into account in the application;

¹ The locality should be matched to existing statistical sources—so as to enable analysis and comparison on a statistical local area, or local government area, basis.

² This would be expected to include projections of gaming revenue over the following three years and an indication of where this revenue might come from.

- (e) enforceable undertakings proposed by the applicant to be included as conditions of the licence when granted, relating to venue-based responsible gambling measures to be undertaken by the applicant.
- (3) All applications should be required to be advertised, including by the placement of notices in daily newspapers and on the proposed premises.

3. Determination process

- (1) The Commissioner should take steps to ensure that a full range of opinion of the appropriateness or otherwise of premises licensed for gaming is available in the application and determination process. For that purpose, the Commissioner should give consideration to inviting the participation of the relevant local government council and agencies with skill and expertise in responsible gambling or gambling rehabilitation. This is a matter which would need to be assessed on a case by case basis.
 - (2) The Commissioner should give consideration to the imposition of licence conditions to ensure that, if a licence is granted, the licensed gaming business is, and continues to be, conducted in the manner foreshadowed in the application, noting that a change in the manner of operation would then be able to be scrutinised through a process to amend licence conditions.
 - (3) The Commissioner should give consideration to the imposition of licence conditions to ensure that, if a licence is granted, any proposed venue-specific harm minimisation measures are, and continue to be, implemented. A change in the harm minimisation program would then be able to be scrutinised through a process to amend licence conditions.

NOTICE TO MARINERS

No. 37 OF 2005
(FORMERLY NOTICE NO. 5 OF 2005)

South Australia—Murray Mouth—Dredging Works—Change of Access for Small Craft

MARINERS are advised that as from 4 November 2005 until further notice:

Two cutter suction dredges are conducting dredging operations inside the Murray River Mouth (chart position 138°53'00"E and 35°33'35"S). The operations will take place between Beacon No. 11 in the Goolwa Channel and through to the Coorong Channel in the vicinity of Barker Knoll. The dredges operate continuously day and night and will display the appropriate lights and shapes as prescribed by the Collision Regulations.

Each dredge has a floating pipeline extending along the landward shoreline of either the Sir Richard Peninsula or the Younghusband Peninsula. A pump barge may be in operation on either shoreline. Sand will be deposited on the ocean shoreline of either Peninsula, along a 500 m zone starting approximately one kilometre from the mouth.

An Aquatic Activity Licence has been issued to restrict access by all personnel and aquatic craft to the vicinity of the Murray Mouth. A restricted area to all personnel and aquatic craft has also been placed on the ocean side, for a distance of 1.5 km from the Mouth along both the Younghusband and Sir Richard Peninsulas, extending seaward for a distance of 100 m.

Vessels wishing to pass between the Goolwa and Coorong Channels are permitted to enter the licensed area during daylight hours between sunrise and sunset. Vessels must only pass through to the north side of the buoyed zone around each dredge. Vessels are not permitted to hold or anchor in the licensed area.

Orange or yellow buoys, either connected by a surface cable and rod, or individually anchored, will mark an area around each dredge. Vessels are not permitted to enter this buoyed zone. The zone will be similarly marked on any adjacent sandbar.

The positioning of the buoyed zones is controlled by dredge operations and provides no guarantee of water depth or possibility of vessels to pass either dredge. Vessels are reminded that large dredge position changes can occur to meet the dredging plan, and this can significantly change or block any public boating access.

Mariners are further advised that anchoring is prohibited in the area, and will be strictly enforced, non-compliance will result in a prosecution, in accordance with the Harbours and Navigation Act Regulations 1994.
