## DEVELOPMENT ACT 1993, SECTION 48: DECISION BY HER EXCELLENCY THE GOVERNOR

*Preamble*

1. The Governor, by a decision made on 29 January 1998 and published in the *Gazette* of that date at pages 320-321, granted development authorisation under section 48 of the Development Act 1993, for the development of a waste management facility in the form of a solid waste landfill in the area of the District Council of Mallala. That development authorisation was subject to the 9 conditions attached to the authorisation.

2. By a notice published in the *Gazette* of the same date at page 321, the Governor acting under section 48 (8) of the Development Act 1993, delegated the power under section 48 (7) of that Act to revoke or vary the conditions of that development authorisation to the Development Assessment Commission.

3. Integrated Waste Services Pty Ltd, the person having the benefit of the development authorisation has applied for an amendment to that development authorisation to receive low level contaminated soil and liquid treatment plant residues at the approved solid waste landfill depot and dispose of these wastes into cells that are separate from those currently used to dispose solid wastes.

4. The proposal has been the subject of an Amended Environmental Impact Statement and an Amendment to the Assessment Report under the Development Act 1993.

5. I am satisfied that an appropriate Amended Environmental Impact Statement, and an Amendment to the Assessment Report that encompasses the amended development have been prepared, and have, in considering the application, had regard to all relevant matters under section 48 (5) of the Development Act 1993.

*Decision*

PURSUANT to section 48 of the Development Act 1993, and with the advice and consent of the Executive Council, and having due regard to the matters set out in section 48 (5) and all other relevant matters, I:

- (a) grant a provisional development authorisation in relation to the proposed Amended Major Development referred to in the Preamble and subject to the Conditions and Notes to the applicant below;
- (b) reserve my decision on the following matters (upon application of further information) pursuant to section 48 (6) and Regulation 64 (1):

- (c) specify all matters relating to this amended development authorisation as matters in respect of which conditions of this authorisation may be varied or revoked, or new conditions attached;
- (d) specify, for the purposes of section 48 (11) (b) of the Development Act 1993, the period of two years from the date hereof, as the time within which substantial work must be commenced in relation to the amendment indicated in the preamble, failing which I may cancel the authorisation relating to the receipt and disposal of low level contaminated soil and liquid treatment plant residues.

#### CONDITIONS OF APPROVAL

##### *Solid Waste Balefill*

1. The work shall be carried out as shown on the plans (Figures 3.1 to 3.9) in the Development Application Report dated 28 November 1997, included with the Development Application dated 2 December 1997, except as varied by these conditions.

2. Subject to conditions 3, 4 and 5, all waste received for disposal at the facility shall be shredded and baled.

3. Unbaled green waste or unbaled construction or demolition waste of appropriate particle sizes may be placed and compacted in any voids unavoidably occurring between bales and the inclined surface of the cells in which those bales are placed to the reasonable satisfaction of the Environment Protection Authority ('the EPA') and in accordance with any applicable requirements of a relevant environmental authorisation.

4. Waste materials received for disposal at the facility need not be shredded before baling where shredding of those materials is not required for the purpose of producing bales of a density and structural integrity that satisfy the applicable requirements of any relevant environmental authorisation.

5. Non-friable asbestos waste shall not be shredded or baled but shall be disposed of in accordance with the applicable requirements of any relevant environmental authorisation.

6. All perimeter plantings shall be started as early as practicable after the date of this authorisation to achieve maximum amelioration of visual impacts.

Screening by suitable plantings where adequate natural screening is not provided, shall be provided for the perimeter fence, all built structures, stockpiles and internal roads (where practicable) using suitable species in accordance with the Vegetation Management and Revegetation Plan proposed as part of the Landfill Environmental Management Plan (LEMP).

8. All firebreaks and external drainage channels shall be located on the inner edge of the vegetation screen and existing stands of native vegetation. In the event that drainage channels are required to be located close to the site boundary, their redesign to form low-lying wetland/saltmarsh communities as part of the vegetation screen shall be undertaken and implemented to the satisfaction of the EPA.

9. A leachate monitoring bore shall be installed within each cell to assist with leachate management, particularly if leachate circulation is incorporated in the Landfill Environmental Management Plan (LEMP).

11. The proponent shall pay all reasonable costs of the detailed design and construction of any public roadworks made necessary by this development. Such works may include the opening and associated left turn deceleration lane from Port Wakefield Road, and the upgrading of the entrance to balefill junction to the satisfaction of the Commissioner of Highways.

12. The proponent shall seal (two coat spray seal) the internal site access road for a minimum of 520 m from the nearest residence.

13. The applicant shall prepare a Vegetation Management and Revegetation Plan (which may be included in the LEMP) to the reasonable satisfaction of the Development Assessment Commission and must implement that Plan once it has been approved by the Development Assessment Commission.

- The head of leachate on the liner shall not exceed 300 mm (excluding the sump) at all times. To facilitate this, the trigger level for leachate extraction out of the leachate sump shall be set at 290 mm.
  - In addition to automatic leachate data readings, a manual monitoring probe shall be installed and calibrated to allow for direct readings of the vertical elevation of leachate in the riser pipe and conversion to the maximum leachate head on top of the liner.
  - Leachate levels shall be read manually daily and recorded in the on-site operations logbook or as specified otherwise in the EPA licence.
20. Distance between LLCS/LTPR cells and Balefill cells (reference drawing 3307D03, 18/8/2004) shall be as follows:
- The distance between LLCS/LTPR cells and Balefill cells shall be at a minimum of 5 m, measured between the toe of the LLCS cell structure (that is where the outer surface of the cap of the completed LLCS/LTPR cell joins the outer surface of the underlying clay liner for the same cell) and the cap of the nearest balefill cell (that is where the outer surface of the cap of a completed balefill cell joins the outer surface of the underlying clay liner).

No waste shall be received and disposed of prior to written acceptance of the 'As Constructed Report' by the EPA.
23. Coverage of waste requirements shall be as follows:
- All waste shall be covered as soon as reasonable practicable after the receipt of waste and placement in the cell or at close of business on each business day with at least 150 mm of cover material (waste fill or intermediate landfill cover with the restriction to a maximum particle size of 100 mm).
  - If a load of particularly odorous material is received at the LLCS/LTPR cell, it shall be covered immediately with a minimum of 150 mm cover material.
  - During periods when the LLCS/LTPR cell is not operating, routine monitoring for odorous gases shall be carried out as part of the site monitoring program and may trigger the application of additional cover material.
  - Alternative cover materials may be used after the proponent:
    - has demonstrated to the EPA that the proposed material and placement method result in an equivalent or better performance compared to the approved material; and
    - has received written approval from the EPA prior to the use of alternative materials and placement methods.
24. Groundwater management requirements shall be as follows:
- An additional groundwater well shall be installed west of cell 30 and the first round of groundwater sampling and testing shall be completed at least two weeks prior to commencement of construction of cell 31.

  - Four monitoring rounds at three monthly intervals in the first 12 months of operation shall be carried out to establish additional background analyte levels around cell 31.
  - Six monthly monitoring rounds shall be undertaken following the completion of the initial 12 months of groundwater monitoring or as specified otherwise in the EPA licence.
  - Prior to the commencement of construction of any other cell for the receipt of LLCS/LTPR, the groundwater management and monitoring program shall be reviewed and submitted for EPA approval.
25. Surface Water Management requirements shall be as follows:
- A stormwater management plan shall be developed and submitted for EPA's approval addressing all issues related to the staged construction of LLCS/LTPR cells on-site prior to commencement of construction of cell 31.
  - The stormwater management plan shall provide surface water control and management measures for:
    - surface water or stormwater run-off that does not interact with the waste material or other operational areas of the site and is considered to be uncontaminated;
    - surface water that comes into contact with waste materials or is collected from landfill areas or other operational areas and is considered to be contaminated;
    - surface run-off from the final landfill cap which has to be controlled;
    - diversion of surface water run-off from perimeter areas away from the operating cell.
26. Landfill Environmental Management Plan (LEMP) requirements shall be as follows:

Building rules certification shall be obtained in accordance with conditions 27 and 28.
- BUILDING RULES**
28. No part of the Major Development deemed to be building work shall commence until a favourable decision has been notified to the applicant by me or my delegate in respect of the reserved matter referred to in subparagraph (i) in paragraph (b) of the Decision section above.

29. A decision on building rules compliance will only be made after a Building Rules assessment and certification has been undertaken and issued by the District Council of Mallala, or a private certifier, in accordance with the provisions of the Development Act 1993, and after the Minister for Urban Development and Planning receives a copy of all relevant certification documentation, as outlined in Regulation 64 of the Development Regulations 1993 (refer to 'Notes to Applicant' below for further information).

#### NOTES TO THE APPLICANT

1. To provide additional screening and wildlife habitat the following options could be investigated by the proponent, council, community and local landowners:

- revegetation of the road reserve along Prime Beach Road, in conjunction with the District Council of Mallala and the community;
- revegetation of the road reserve along Port Wakefield Road, in conjunction with the Department of Transport and Urban Planning (Transport SA) to further reduce views from the eastern direction;
- plantings on private property along fence lines adjoining the site, in conjunction with landowners and the community.

2. All sedimentation basins, evaporation ponds, and surface water drainage channels should be suitably located, designed and managed to ensure native vegetation (especially low-lying salt-marsh communities) is not adversely affected by construction activities or groundwater mounding and, if possible, the ecological value enhanced.

3. A comprehensive Pest Plant and Animal Management Plan must be implemented prior to landfill operations commencing, to ensure the site is free of as many pest species as possible from the onset and adequate monitoring and follow-up control should occur, as discussed in the Assessment Report.

4. Whilst not totally within the control of the proponent, monitoring and control programs to reduce the risk of disease transmission between activities in the area may ideally be prepared by adopting a district approach, in co-ordination with the Adelaide Plains Animal and Plant Control Board, Department of Primary Industries and Resources and landowners.

5. To minimise and control any on-site soil erosion (particularly of stockpiled material), a Soil Erosion and Drainage Management Plan (SEDMP) as described in the Environment Protection Agency's 'Stormwater Pollution Prevention Codes of Practice', must be prepared and approved as part of the LEMP, before the site becomes operational.

6. As part of the LEMP, a Surface Water Management Plan must be prepared by the proponent to the satisfaction of the EPA prior to receipt of any waste. The plan should address the collection and management of all on-site surface water (including any contaminated run-off originating from roadways, carparks and hardstands, the vehicle workshop or wheel washing facility) and management of all surface water flows entering the site from land external to the site, in particular to ensure their final discharge does not impact adversely on any downstream wetlands.

7. A monitoring program must be established to record levels of coastal flooding in the western section of the site and, if results indicate a significant risk, a review process be undertaken (ideally through any relevant local community consultative committee) to determine whether to proceed with Stage 9.

8. If blasting is required to remove any of the Ripon Calcrete, explosion vibration characteristics and monitoring requirements must be determined in consultation with the Environment Protection Authority and District Council of Mallala, prior to commencement.

9. The Environment Protection Agency must be provided with all additional data concerning the site geology as it becomes available, as this could necessitate minor changes to landfill design or method of operation and the installation of additional groundwater monitoring bores.

10. To enable detailed design of the proposed groundwater protection system, to determine the minimum depth at which the landfill cells should be based and to enable detailed design of the surface water management system; further investigation of

groundwater levels and behaviour on the site must be undertaken prior to finalisation of the detailed design of the landfill and preparation of management plans.

11. As part of the LEMP, a detailed Groundwater and Leachate Management Plan must be prepared by the proponent to the satisfaction of the Environment Protection Authority, prior to receipt of any waste. The Plan must demonstrate how the method of hydraulic containment proposed can be practically achieved. Further hydrogeological investigations must be carried out prior to the commencement of any landfill construction in order to fully define the dewatering and groundwater disposal requirements and to provide details of how the cells can be dewatered and constructed for full hydraulic containment of leachate. In particular, monitoring of watertable levels must commence immediately after the granting of the development authorisation in order that the magnitude of seasonal fluctuations can be fully established prior to construction of the landfill. The Plan may provide for staging of leachate and groundwater management works which may be required as a result of the staging of waste disposal activities upon the site, and should include contingency measures to be implemented in the event of any failure of the leachate management system.

12. A more sustainable after-use for the site that will encourage the regeneration and rehabilitation of natural communities must be considered during future post closure planning.

13. If appropriate with the desired end use to be determined in more detail at a later stage, the entire landform may be planted with appropriate types of native vegetation cover.

14. Determination of interim and post closure land uses of the site, proposed to be undertaken in association with any relevant local community consultative committee, must be undertaken as required by the Environment Protection Authority as part of the LEMP.

15. Pursuant to Development Regulation 64, the applicant is advised that the District Council of Mallala or private certifier conducting a Building Rules assessment is required to:

- (a) provide to the Minister a certification in the form set out in Schedule 12A of the Development Regulations 1993 in relation to the building works in question; and
- (b) to the extent that may be relevant and appropriate:
