This Notice will have effect at the expiration of seven days from publication of this Notice in a newspaper circulating in that part of the State in which the wells, surface water and watercourses in the Eastern Mount Lofty Ranges Area are situated.

Dated 14 September 2009.

JAY WEATHERILL, Minister for Environment and Conservation

NATURAL RESOURCES MANAGEMENT ACT 2004

Notice of Prohibition on Taking Water from Wells in the Eastern Mount Lofty Ranges Area

PURSUANT to section 132(1) of the Natural Resources Management Act 2004 ('the Act'), I, Jay Weatherill, Minister for Environment and Conservation in the State of South Australia and Minister to whom the administration of the Act is committed, being of the opinion that the rate at which water is being taken from wells in the area described in Schedule 1 ('the Underground Water Area') is such that there is a risk that the available water will not be sufficient to meet future demand, hereby prohibit the taking of water from wells except in the circumstances specified in Schedule 2.

SCHEDULE 1

The Underground Water Area

The area bounded by the bold red line in GRO Plan No. 423/2003 ('the Underground Water Area').

SCHEDULE 2

1. A person may take water from a well in the Underground Water Area in accordance with the terms of a written authorisation granted by me or my authorised agent pursuant to:

- (a) this Notice; or
- (b) the Notice published in the *Government Gazette* on 16 October 2003 at pages 3815-3816 ('Notice of Prohibition on Taking Water from Wells in the Eastern Mount Lofty Ranges Area') pursuant to section 16(1) of the Water Resources Act 1997; or
- (c) the Notice published in the *Government Gazette* on 15 September 2005 at pages 3330-3331 ('Notice of Prohibition on Taking Water from Wells in the Eastern Mount Lofty Ranges Area') pursuant to section 132(1) of the Act; or
- (d) the Notice published in the *Government Gazette* on 13 September 2007 at pages 3682-3683 ('Notice of Prohibition on Taking Water from Wells in the Eastern Mount Lofty Ranges Area') pursuant to section 132(1) of the Act.

2. An authorisation under this Notice may be granted to:

- (a) A person ('a Current User') who has been taking water from a well in the Underground Water Area during the period 1 July 2000 to 15 October 2003 inclusive ('the Relevant Period'), entitling that person to take:
 - where the water taken during the Relevant Period was to water a crop or crops, the amount of water reasonably necessary, in my opinion, to water that crop or those crops, the amount being determined taking into account the maximum area of each crop or crops grown, the water requirements of the respective crop or crops and the irrigation capacity of the irrigation equipment used to water the crop or crops; or
 - where the water was taken during the Relevant Period for any other purpose, the amount of water which, in my opinion, is reasonably necessary to continue that purpose in the manner in which it had been undertaken during the Relevant Period.
- (b) The transferee of an interest in land (including under a contract of sale or grant of a lease) ('the new interest-holder') where:
 - the transferor or prior holder of an interest in the land (including as registered proprietor or lessee) ('the prior interest-holder') is the holder of an authorisation under a Notice listed in Clause 1; and
 - the prior interest-holder and the new interest-holder apply to me or my authorised agent for the cancellation (in whole or in part) of the prior interest-holder's authorisation and the grant of an authorisation for the same purpose and on the same land as the cancelled authorisation (or cancelled part of the authorisation) to the new interest-holder,

entitling the new interest-holder to take the same (or a lesser) quantity of water from the same resource or resources as the prior interest-holder was authorised to take under the cancelled authorisation (or cancelled part of the authorisation).

- (c) Subject to Clause 4, a person ('a Prospective User') who did not take any water from a well but who needs water for a development, project or undertaking:
 - to which that person was legally committed during the Relevant Period; or
 - in respect of which that person had, in my opinion, committed significant financial or other resources during the Relevant Period, entitling that person to take the amount of water from a well in the Underground Water Area, which in my opinion, is reasonably necessary to undertake the development, project or undertaking to which that person was committed.

3. A Prospective User may not be granted an authorisation or may only be granted an authorisation subject to conditions relating to the manner of taking water where, in the opinion of me or my authorised agent:

- (a) the taking of water will detrimentally affect the ability of other persons to take water from any watercourse, well or dam for domestic purposes or for watering stock (other than stock subject to intensive farming); or
- (b) the taking of water will detrimentally affect the capacity of the water resource to meet the current or future demand including the demands of ecosystems dependent on that water resource.

4. Until authorised under this Notice, a Current User may continue to take an amount of water equivalent to the maximum amount taken in any one year, from the same source and for the same purpose or purposes as that person took during the Relevant Period without a written authorisation.

5. This Notice does not apply to the taking of water:

- (a) pursuant to section 124 (4) of the Act for domestic purposes or for watering stock (other than stock subject to intensive farming); or
- (b) for fire fighting purposes or public road making purposes; or
- (c) for the purpose of the application of chemicals to non-irrigated crops or non-irrigated pasture, or for the application of chemicals to control a pest plant or animal.

6. The following condition applies to the taking of water in accordance with an authorisation granted under a Notice listed in Clause 1:

- the water may only be taken through a meter which accurately measures the quantity of water taken and is at all times in good working condition.

In this Notice:

‘Maximum area’ for a particular crop means the average of the maximum areas of land planted to a particular crop during the Relevant Period.

‘Water requirement’ of a crop means the reasonable rate of irrigation (expressed as a volume of water per hectare) to properly produce that crop.

‘Irrigation capacity’ of irrigation equipment means the amount of water that can be applied by the usual operation of that equipment in its condition at 15 October 2003, under usual pumping rates, hours of operation and seasonal fluctuations.

This Notice will have effect at the expiration of seven days from publication of this Notice in a newspaper circulating in that part of the State in which the wells in the Underground Water Area are situated and will remain in effect for two years unless earlier varied or revoked.

Dated 14 September 2009.

PURSUANT to section 132 (1) of the Natural Resources Management Act 2004 (‘the Act’), I, Jay Weatherill, Minister for Environment and Conservation in the State of South Australia and Minister to whom the administration of the Act is committed, being of the opinion that:

- the rate at which surface water is taken in the area described in Schedule 1 (‘the Area’) is such that the surface water available can no longer meet the demand; and
- the rate at which water is taken from watercourses in the Area is such that there is a risk that the available water will not be sufficient to meet future demand,

hereby prohibit the taking of surface water and water from watercourses in the Area except in the circumstances specified in Schedule 2.

3. A Prospective User may not be granted an authorisation or may only be granted an authorisation subject to conditions relating to the manner of taking water where, in the opinion of me or my authorised agent:

- (a) the taking of surface water or water from watercourses will detrimentally affect the ability of other persons to take water from any watercourse, well or dam for domestic purposes or for watering stock (other than stock subject to intensive farming); or

4. Until authorised under this Notice, a Current User may continue to take an amount of water equivalent to the maximum amount taken in any one year, from the same source and for the same purpose or purposes as that person took during the Relevant Period without a written authorisation.

In this Notice:

‘Maximum area’ for a particular crop means the average of the maximum areas of land planted to a particular crop during the Relevant Period.

OCCUPATIONAL HEALTH, SAFETY AND WELFARE
ACT 1986*Approved Code of Practice for First Aid in the Workplace*

NOTICE is hereby given that, pursuant to subsection 63 (1) of the Occupational Health, Safety and Welfare Act 1986, the following code of practice is an approved code of practice:

Code of Practice for First Aid in the Workplace

The Code of Practice for First Aid in the Workplace shall be read as incorporating the 'Foreword', which is included in this notice and shall have effect from 10 December 2010.

P. CAICA, Minister for Industrial Relations

FOREWORD

The term 'approved code of practice' has a particular meaning under the South Australian Occupational Health, Safety and Welfare Act 1986.

An approved code of practice is designed to be used in addition to the Act and Regulations. In proceedings for an offence against the Act, where it is proved that a person failed to comply with a provision of a relevant approved code of practice, the person shall be taken to have failed to exercise the required standard of care, in the absence of proof to the contrary (section 63A of the Act).

Thus, a code of practice provides practical guidance on how a particular standard of health and safety can be achieved. It describes the preferred methods or courses of action for achieving this standard of health and safety. However, an approved code of practice allows the flexibility to show that an equivalent or better standard of health and safety is achieved by alternative action. An approved code of practice is therefore different from a regulation where the responsible person must meet the specific requirement of the regulation.

In summary, an approved code of practice:

- provides practical guidance;
- should be followed unless there is another solution which achieves the same or a better standard of health and safety; and
- can be used to support prosecution.

Codes of Practice are approved by the Minister for Industrial Relations, following recommendation from the SafeWork SA Advisory Committee which is constituted under the Occupational Health, Safety and Welfare Act 1986.

*Special Conditions**Licence Term*

The PELs will be offered for a five-year term with a right of renewal for a further five-year term at the end of the initial term, with compulsory relinquishment of 50% of original area at renewal. If proposed amendments to the Petroleum Act 2000, are enacted in the interim (before grant), they will be granted for an initial five-year term with a right to a further two five-year terms with a minimum relinquishment of 33.33% of original area at each renewal (subject to prevailing Petroleum Act 2000 provisions).

Security

A minimum \$50 000 security (amount subject to review) will be required to be lodged by the licensee prior to entering the guaranteed licence term in which seismic or well activities are planned, or prior to undertaking earlier seismic or well activities.

Applications

Applications lodged under section 65 (1) of the Petroleum Act 2000, are required to be made in the approved form as identified on the DVD 'Cooper Basin Acreage Release CO 2009-A, B, C, D and E' (can be ordered from: www.petroleum.pir.sa.gov.au or the Director Petroleum and Geothermal at the address below).

Applications:

- must satisfy the requirements of Regulation 4 of the Regulations under the Petroleum Act 2000;
- must be accompanied by a proposed work program for the first five year term of the licence;
- must be accompanied by a statement of the financial and technical resources available to the applicant; and
- must be accompanied by the scheduled application fee.

Applications close at 4 p.m. on Thursday, 15 October 2009 (Australian Central Time).

The following special instructions for lodgement of applications should be observed:

- the application and supporting data, together with the scheduled application fee (currently \$3 518 per PEL application), payable to the Department of Primary Industries and Resources SA, should be sealed in a plain envelope or package and clearly marked as 'Application for Area CO 2009-A, B, C, D or E—Commercial-in-Confidence';
- the envelope or package should then be enclosed in another envelope and posted, or delivered by hand to:

Director Petroleum and Geothermal
Minerals and Energy Resources
Department of Primary Industries and Resources SA
Level 7, 101 Grenfell Street
Adelaide, S.A. 5000

Copies of the basic exploration data pertaining to the area comprising this notice are available from the Petroleum and Geothermal Group of the Department of Primary Industries and Resources SA. Enquiries may be directed to Barry Goldstein, Director Petroleum and Geothermal (Telephone (08) 8463 3200; email: barry.goldstein@sa.gov.au).

Criteria for Assessment of Applications

The winning bidder will be selected on the basis of the five year work program bid. The work program must include a statement of exploratory operations the applicant proposes to carry out in each year of the first five-year licence term. The aim of the work program is to evaluate the prospectivity of the licence area and discover regulated resources. It is expected that at least one petroleum exploration well would be included in the five-year work program.

Bids will be assessed taking account of the criteria listed below. It is important to note that the timing of well drilling and seismic acquisition will be taken into account. The most important criteria for assessment of CO 2009-A, B, C, D or E work programs are:

- the number of exploration wells to be drilled in the licence area (development wells are not considered);
- the number of years the applicant is prepared to guarantee the program;
- the extent to which proposed wells are supported by seismic data;
- the amount and nature of seismic surveying to be carried out and its timing;
- other data acquisition (e.g. gravity, aeromagnetic or geochemical surveys);
- seismic reprocessing to be carried out;
- adequacy of financial resources and technical expertise available to the applicant; and
- the applicant's past performance in fulfilling work program commitments elsewhere in Australia.

The Minister will announce the winning bidder, together with details of the work program.

Dated 15 September 2009.

Tandem axle groups fitted with 8 tyres	16.5	17.0
Triaxle group fitted with 12 tyres	20.0	22.5

- 4.1.4.3 In relation to only vehicle combination 'b' in Table 1 of this Notice, the mass on an axle or axle group not fitted with a Road Friendly Suspension must not exceed the limits specified in Table 3 of this Notice for the specified axle or axle group.

Table 3

Axle Group Configuration	General Mass Limit (tonnes)	Mass Limit under this Notice (tonnes)
Tandem axle groups fitted with 8 tyres	16.5	17.0
Triaxle group fitted with 12 tyres	20.0	21.0

Explanatory Note

The axle mass limits in Table 3 provide equity for those vehicles which are also eligible for operation under the *Gazette* Notice titled '*Concessional Mass Limits for Vehicles Accredited in the Mass Management module of the National Heavy Vehicle Accreditation Scheme (NHVAS)*'. Operators should note that the use of Road Friendly Suspension is encouraged on as many axles as possible. On triaxle groups, an additional 1.5 tonnes per axle group is allowed and for tandem axle groups, significantly reduced road wear results from Road Friendly Suspension.

- 4.1.4.4 Vehicles must comply with axle spacing appropriate to statutory mass limits (commonly referred to as the General Mass Limits) contained in Schedule 1, Part 1, Clause 3 of the *Road Traffic (Mass and Loading Requirements) Regulations 1999*.
- 4.1.4.5 The total mass of a vehicle combination may only exceed 42.5 tonnes by the amount that the sum of the masses of the axle or axle groups operating at higher mass limits exceed the mass limits specified in the columns titled General Mass Limit (tonnes) in Tables 2 and 3 above.

4.1.5 *Mass Management Accreditation*

- 4.1.5.1 Vehicles or vehicle configurations fitted with a triaxle group loaded in accordance with the Higher Mass Limits in Table 2 of this Notice, or where any axle or axle group is specified and loaded in accordance with Table 3 of this Notice, must be accredited under the Mass Management Module of the NHVAS.
- 4.1.5.2 The Prime Mover must display a valid NHVAS (Mass Module) label.

- 4.1.5.3 All tri-axle trailers in the vehicle combination, when loaded in accordance with the Higher Mass Limits in Table 2 of this Notice, must display a valid NHVAS (Mass Module) label, where displaying labels on trailers is a requirement of the accrediting agency.
- 4.1.5.4 Drivers of vehicles accredited in South Australia must carry documented evidence (which may be the Route Compliance Certificate) of route planning, confirming that a higher mass limit route is available by reference to the maps contained in this Notice, in accordance with Standard 4 (Records and Documentation) of the Mass Management Module of the NHVAS and shall produce the signed documented evidence if requested by an Authorised Officer appointed under the *Road Traffic Act 1961*, or a Police Officer:
- 4.1.5.4.1 Where a form other than a Route Compliance Certificate is used, the form must record the equivalent information that is required on the Route Compliance Certificate including axle and gross weight, route to be traversed, be dated and signed by the driver prior the commencement of the journey.
- 4.1.5.5 Vehicles accredited in states and territories other than South Australia under the scheme specified in 4.1.5.1 may operate in South Australia under the terms and conditions and on the routes detailed in this Notice provided:
- 4.1.5.5.1 the driver:
- (i) has determined that a higher mass limit route is available by reference to the maps described in 4.1.3.1 of this Notice;
 - (ii) records the route details on the DTEI Higher Mass Limit Route Compliance Certificate and has signed the Certificate;
 - (iii) carries the completed Route Compliance Certificate in the vehicle when operating at higher mass limits; and
 - (iv) produces the Route Compliance Certificate if requested by an Authorised Officer appointed under the *Road Traffic Act 1961*, or a Police Officer; and
- 4.1.5.5.2 the scheme member retains the original copy of the Route Compliance Certificate for a period of not less than 12 months from the date it is signed for auditing purposes.

Explanatory Note

Only vehicles or vehicle configurations with triaxle groups operating at higher mass limits are required to carry documented evidence of route compliance (e.g. DTEI Higher Mass Limit Route Compliance Certificate) when operating in South Australia under the terms and conditions and on the routes detailed in this Notice.

4.1.6 Documentation

4.1.6.1 When operating under this Notice, you must:

4.1.6.1.1 carry at all times a legible current and complete copy of:

- (i) this Notice; and
- (ii) all current approved 'Route Network for Higher Mass Limits (HML) Vehicles' route network map(s) specific to the entire route being travelled/operated on during the particular journey being undertaken, including more specific detailed maps of routes and townships where available.

4.1.6.1.2 Produce any or all of the documents indicated in 4.1.6.1.1 above when requested by a DTEI Authorised Officer appointed under the *Road Traffic Act 1961* or a Police Officer.

4.2 Except as otherwise specified in this Notice, the standard form conditions prescribed in the *Road Traffic (Oversize or Overmass Vehicle Exemptions) Regulations 1999* for the purposes of section 115 of the Act, shall not apply.
