Standing and default contract prices apply in accordance with the following principles:
  - (a) 'Daily Consumption' is the total electricity consumption for the period to which the customer's bill relates, divided by the number of days in that period;
  - (b) Domestic Light/Power 110:
    - applicable to all residential consumption (excluding Off-Peak Controlled Load Tariff 116) in premises used wholly or principally as private residences;
  - (b) Controlled Load 116:
    - for electricity used in permanently installed storage water heaters with a rated delivery of not less than 125 litres, storage space heaters and other approved thermal storage applications; the hours of application are fixed from time to time by Powerdirect with control by time switch or other means. This price does not apply to electricity used outside those hours;
    - this price is only available in conjunction with tariffs 110, 126Q, 126M, 128Q or 128M;
  - (d) General Supply 126Q (Quarterly Meter Reading):
    - available only to non-residential customers;
  - (e) General Supply 126M (Monthly Meter Reading)
    - available only to non-residential customers;
    - applies to customers whose meters are scheduled to be read monthly, and who are billed monthly;
    - a monthly meter reading fee applies to this tariff;
  - (f) General Supply Time of Use 128Q (Quarterly Meter Reading):
    - available only to non-residential customers with appropriate metering;
  - (g) General Supply Time of Use 128M (Monthly Meter Reading):
    - available only to non-residential customers with appropriate metering;
    - applies to customers whose meters are scheduled to be read monthly, and who are billed monthly;
    - a monthly meter reading fee applies to this tariff.
2. Peak period is 0700 hours to 2100 hours from Monday to Friday (Central Standard Time) for all tariffs other than tariff 110 except where the network meters do not recognise specific tariff days. In these situations peak period is 0700 hours to 2100 hours (Central Standard Time) each day for tariffs other than tariff 110.
3. Off peak period is all times other than peak period.
4. Where prices change during a billing cycle the bill for that billing cycle will be calculated on a pro-rata basis using:
  - (a) the old price up to and including the date of change, and
