NATURAL RESOURCES MANAGEMENT ACT 2004

Notice of Authorisation to Take Water

PURSUANT to Section 128 of the *Natural Resources Management Act 2004*, I, Ian Hunter, Minister for Sustainability, Environment and Conservation, hereby authorise the taking of roof runoff from all Surface Water Prescribed Areas within the State of South Australia for the purposes of commercial (including irrigation), industrial, environmental or recreational use, subject to the conditions specified in Schedule A.

SCHEDULE A

1. Roof runoff taken pursuant to this authorisation can only be collected where the volume of water deemed to be collected from the connected roof area is equal to or less than 1 500 kilolitres per annum.
2. The volume (in kilolitres) of water deemed to be collected from the connected roof area on an allotment is determined as follows:

connected roof area (in square metres) x average annual rainfall for the allotment (in millimetres)

1 000

on the basis that 1 millimetre of rain per square metre of connected roof area yields 1 litre of water, and that the relevant map of those appended as Attachments 1-7 is used to determine the average annual rainfall for the allotment.

3. Roof runoff taken pursuant to this authorisation must be collected in closed water storage facilities.
4. Any water collected pursuant to this authorisation that overflows from a closed water storage facility must be released into the environment in a manner which minimises any harm to the environment.

For the purposes of this Notice:

‘roof runoff’ means surface water that runs off any building or structure fixed to land.

‘connected roof area’ means the total roof area on an allotment which is connected to a closed water storage facility.

‘allotment’ means an allotment delineated on a certificate of title under the Real Property Act 1886 and includes two or more contiguous allotments owned or occupied by the same person. Allotments will be taken to be contiguous if they abut one another at any point or if they are separated only by a street, road, lane, footway, court, railway, thoroughfare or travelling stock route or a reserve or other similar open space dedicated for public purposes.

‘closed water storage facility’ means a storage facility that is sealed and covered and prevents loss of water through evaporation, seepage or leaks, excluding overflow (for example, a water storage tank).
