The Aquaculture Tenure Allocation Board (**ATAB**) will assess applications and make recommendations to the Minister for Primary Industries and Regional Development (or delegate of the Minister) as to any applications that should not be granted and as to the order of merit of the remaining applications. The key objective of the tenure allocation process under the *Aquaculture Act 2001* ("**the Act**") is to ensure an equitable and transparent process is followed to allocate tenure to operators who will use the marine resource at an optimum level (in terms of the quality and quantity of output relative to the capacity of the environment).

ATAB assesses all applications received in accordance with a public call for applications for new leases within aquaculture zones designated as public call zones (in State waters) together with the proposed activity to be licenced to ensure fairness in the tenure release process. Under section 35(5), ATAB must assess each application received in accordance with a public call for applications taking into account —

- (a) the objects of the Act; and
- (b) any prescribed criteria or other relevant provisions of the applicable aquaculture policy; and
- (c) any applicable criteria and weightings.

Upon completion of assessment, the ATAB must make recommendations to the Minister as to applications that should not be granted and the order of merit of remaining applications.

The objects of the Act are:

- (a) to promote the ecologically sustainable development of marine and inland aquaculture; and
- (b) to maximise the benefits to the community from the State's aquaculture resources; and
- (c) to ensure the efficient and effective regulation of the aquaculture industry.

### Part A - ATAB Criteria

The ATAB will assess applications and apply the following criteria established in accordance with section 35(2)(b) of the Act:

- That the intended purpose is within the objects of the Act.
- That the application is consistent with the applicable zone policy.
- That the lease area to which the application relates must be located within the applicable zone area of the applicable zone policy and be for the farming of the permitted species.
- That the size of the applicant's proposed lease site or sites does not exceed the available hectares within the applicable zone area of the applicable zone policy.
- That the knowledge and experience of the applicant in relation to the farming of the permitted species, including in conditions comparable to those in the applicable zone area, are considered adequate.
- That the applicant shows a high level of commitment to ensuring that the proposed aquaculture operations will be managed in an environmentally sustainable manner and operations will be compliant with the requirements of the Act and other relevant legislation.
- That the applicant has the financial capacity (including the business capacity) to establish and operate the proposed site as a viable enterprise.
- That the applicant is ready to develop and commence operations on the site immediately or as soon as possible.
- That the applicant shows a high level of commitment to ecologically sustainable development of the site and to the long-term growth and development of the aquaculture industry and its contribution to, and links with, the regional economy.

- ATAB will ensure that the proposed activity is located within the Port Blanche aquaculture zone, is the farming of bivalve molluscs (other than mussels) and that the proposed site(s) does not exceed 37.5 hectares.
- ATAB will evaluate the nature of the proposal including proposed farming practices and processes.

- ATAB will evaluate if proposed farming structures are appropriate for the oceanographic conditions of the zone, taking into consideration the types of farming structures used in this zone in the past and their ability or inability to withstand these conditions.
  - ATAB will evaluate the proposed stages and timeframes of development to ensure they are realistic and achievable.
- Technical and Environmental Capacity**
- ATAB will evaluate the level of knowledge and previous experience the applicant has in the farming of the proposed species, including in conditions comparable to those in the relevant aquaculture zone.
  - ATAB will evaluate the applicant's level of commitment in relation to ensuring the proposed operations are managed in an environmentally sustainable manner and that the intended farming activity will be compliant with the requirements of, or obligations under, the Act.
  - ATAB will evaluate the applicant's readiness to develop and commence operations on the site.
  - ATAB will evaluate the applicant's level of commitment to ecologically sustainable development of the site, and to the long-term growth and development of the aquaculture industry in the region.
- Business capacity**
- ATAB will evaluate the information provided regarding the business capacity of the applicant to undertake the proposed farming activities.
  - To assist ATAB in evaluating business capacity the applicant should provide information including, but not limited to:

The ATAB provides a recommendation to the Minister as to successful (and non-successful) applications in accordance with section 35(7) of the Act. One or more applicants may be offered leases provided that the total area granted as a result of this call for applications does not exceed the hectares released within the zone.

\*For example - Applicants should ensure that they are able to meet conditions of the lease, licence and *Aquaculture Regulations 2016*. Therefore, applicants should refer to examples of lease and licence conditions which are available on the aquaculture public register: [www.pir.sa.gov.au/aquaculturepublicregister](http://www.pir.sa.gov.au/aquaculturepublicregister).

A successful applicant recommended by the ATAB will be eligible to submit a licence application to PIRSA which will be assessed in accordance with the objectives of the Act. A recommendation by the ATAB to grant tenure to an applicant does not guarantee success in obtaining an aquaculture licence. PIRSA and the Environment Protection Authority (EPA) will use additional information to determine any specific licence conditions required.

Lease and licence conditions provided on the public register are for guidance only. Conditions may vary between sites, and it is the responsibility of the operator to ensure they are familiar with their lease and licence conditions, once the lease and licence are granted.

In addition, operators are required to comply with the requirements of all statutes, regulations, by-laws, ordinances, rules or other forms of statutory instruments or delegated legislation applicable to the licensed site or to the use of the licensed site by the licensee, including but not limited to the Act, *Aquaculture Regulations 2016* and the *Livestock Act 1997*. It is the responsibility of applicants to understand the relevant pieces of legislation. Further information on South Australian legislation can be found on the South Australian Legislation website (<http://www.legislation.sa.gov.au>).

Lease/licence holders also must make themselves familiar with other policies of PIRSA as they relate to the operations of the aquaculture farm. These policies are available on the PIRSA web site (<http://www.pir.sa.gov.au/aquaculture/policies>).
