## PLANNING, DEVELOPMENT AND INFRASTRUCTURE ACT 2016

## SECTION 76

*Amendment to the Greater Adelaide Regional Plan and Murray Mallee Regional Plan**Preamble*

It is necessary to amend the Greater Adelaide Regional Plan—version GA2026.3 and the Murray Mallee Regional Plan—version MM2026.2 to make the following minor or operational amendments:

- provide consistency between the Plans and the boundaries of the Environment and Food Production Areas (EFPA) of the *Planning, Development and Infrastructure Act 2016* (the Act)
  - correct an error in the undeveloped land supply figure for the Fleurieu Peninsula subregion in the Greater Adelaide Regional Plan.
1. Pursuant to Section 76 of the Act, I hereby amend the Greater Adelaide Regional Plan to make the following minor or operational amendments:
    - (a) In the ‘Context’ section, ‘Housing trends and land supply’ amend the table under ‘Land Supply Potential (Allotments)’, by deleting the ‘Future Growth Outside EFPA’ and ‘Future Growth Inside EFPA’ table entries, and deleting the word ‘Total’ from the ‘Total Future Growth’ table entry.
    - (b) In the ‘Context’ section, ‘Housing trends and land supply’, for all subregions, amend the table under ‘Land Supply Potential (Allotments)’, by deleting the ‘Future Growth Outside EFPA’ and ‘Future Growth Inside EFPA’ table entries, and deleting the word ‘Total’ from the ‘Total Future Growth’ table entry.
    - (c) In the ‘People, housing and liveability’ theme, ‘Learn more about Outcome 1’, under ‘Future housing land supply’, update text as follows:
 

~~‘This target and accompanying policies succeeded in unlocking development in established areas of Adelaide. However, it means that new greenfield land can only be released from the EFPA, where urban consolidation opportunities have been exhausted.~~

As there are limited options for where the greenfield growth can occur, much of the land identified for medium to long term greenfield growth is within the current EFPA. New growth areas have been identified, and the EFPA has been removed from these locations. These areas will still be subject to structure planning and the rezoning process, and more detailed investigations will be required to work through impacts of interface matters on adjoining farming land to ensure ongoing food security.’
    - (d) In the ‘People, housing and liveability’ theme, ‘Greenfield and township development’ subtheme, under ‘Long-term strategic objectives’, update Objective 6 as follows:
      6. Maintain a greenfield growth schedule of priority locations, ensuring that there is sufficient land supply and to inform future reviews of the spatial application of to be considered for removal and retention from the Environment and Food Production Area (EFPA), to inform future reviews of the spatial application of the EFPA.
    - (e) In the ‘People, housing and liveability’ theme, ‘Greenfield and township development’ subtheme, under ‘Environment and Food Production Areas’, delete ‘Land identified for residential growth within and outside of the EFPAs’ breakout box (comprising Table 3) and update text as follows:
 

~~‘There is legislation in place to manage the growth of Greater Adelaide’s peri-urban areas, in the form of the Environment and Food Production Areas (EFPAs), and the Character Preservation Districts (CPDs) in the Barossa Valley and McLaren Vale. Areas subject to EFPA or CPD legislation cover approximately 90% of the region. These areas are precluded from being subdivided for residential development.~~

~~The EFPAs were introduced in 2017 as part of South Australia’s new planning system, to protect the region’s primary production land, environment and natural resources from urban encroachment.~~

~~The Plan identifies sufficient land to accommodate overall growth over the next 30 years. However, as there are limited options for where the greenfield growth can occur, much of the land identified for medium to long term greenfield growth is within the EFPA. As a result of recent legislative amendments to the Planning, Development and Infrastructure Act, all identified greenfield growth areas in the Plan have been removed from the EFPA and a Limited Land Division Overlay has been applied. The Limited Land Division Overlay will remain until additional investigations have been undertaken that ensure a rolling supply of zoned and development-ready land. Prioritisation of growth areas will be based on orderly growth and transparency of infrastructure costs to the community.~~

~~Table 3 lists the number of hectares identified in 2024 for residential growth within and outside of the EFPAs.~~

**Land identified for residential growth within and outside of the EFPAs (Breakout Box)**

~~There are future growth areas, such as Roseworthy, that are currently within the EFPA that would be logical to expand as infrastructure investment is occurring right now. These areas for growth were identified after consideration of many factors through a multi-criteria analysis, including the opportunity to harness infrastructure investment by the state, and will still need to undergo the rezoning process. Other areas will not be supported to be removed from the EFPA, such as the Virginia Triangle and areas of scenic beauty and environmental value.~~

~~Any proposed changes to the EFPA must be underpinned by evidence about potential impacts on the viability of primary production. Further investigation on interface matters, particularly what impact urban development may have on adjoining farming land (noise, dust, odour, spray drift), will be undertaken during the structure planning process.~~

A key initiative of the government's Housing Roadmap is to ensure there is an appropriate supply of serviced land to meet both current and emerging housing demand. In particular, there is a need to ensure there is an adequate supply of not just zoned, but development ready (serviced), residential land.

A short term action of the Plan is to prepare a schedule of areas to be considered for removal from the EFPA during future reviews to ensure a rolling supply of zoned and development ready land. This will be included in the first update to the Plan. Prioritisation will be based on orderly growth and transparency of infrastructure costs to the community.

- (f) In the 'People, housing and liveability' theme, 'Greenfield and township development' subtheme, under 'Actions', update text in 'Investigation—Greenfield Growth' as follows:  
 'Identify a greenfield growth schedule of priority locations, ensuring that there is sufficient land supply and to inform future reviews of the spatial application of to be considered for removal and retention from the Environment and Food Production Area (EFPA), to inform future reviews of the spatial application of the EFPA, adopting and incorporating any amendments made to EFPA legislation.'
- (g) In the 'Productive economy' theme, 'Primary industry' subtheme, under 'Encroachment of urban development' update text as follows:  
 'Where land is removed from the EFPA, the structure planning of new urban areas needs to consider existing horticultural and farming activities, including the impacts of spray drift and noise, to ensure that new development does not prejudice the continued operation of primary production.'
- (h) In the 'Implementation and Delivery' theme, for all subregions (excluding City of Adelaide), in 'Housing land supply', amend the table under 'Land Supply Potential (Allotments)', by deleting the 'Future Growth Outside EFPA' and 'Future Growth Inside EFPA' table entries, and deleting the word 'Total' from the 'Total Future Growth' table entry.
- (i) In the 'Implementation and Delivery' theme, 'Murray Bridge' subregion, under 'Learn more about the key opportunities and issues' breakout box, under 'Key issues' delete the following text:  
 'A large portion of the future growth areas are currently part of the EFPA. This means that land would not be made available for development in the short term.'
- (j) Amend the spatial layers by transferring all land (or portions of land) identified in the 'Future Greenfield Supply—in EFPA' layer into the 'Future Greenfield Growth Area' layer and then delete the 'Future Greenfield Supply—in EFPA' layer.
- (k) In the 'Layers' legend of the spatial mapping, for the 'Future Greenfield Growth Area' layer, replace the description 'Future greenfield growth areas located outside of the EFPAs' with 'Land identified for future greenfield growth'.
- (l) In the 'Context' section, 'Housing trends and land supply', for the Fleurieu Peninsula subregion, amend the table under 'Land Supply Potential (Allotments)', by updating the table entries and figures to match the following:

Proposed	1,448
Zoned Undeveloped	5,046
Total Zoned Supply	6,494
<del>Total</del> Future Growth	18,046

- (m) In the 'Implementation and Delivery' theme, for the Fleurieu Peninsula subregion, amend the table under 'Land Supply Potential (Allotments)', by updating the table entries and figures to match the following:

<del>Total</del> Future Growth	261,543

- (o) Update the publication date, regional plan version number, amendment type and summary of amendments within the 'Table of Regional Plan Amendments' to reflect the amendments to the Plan as described in this Notice.

**Drafting Note:** ~~strikethrough~~ = delete text, underline = new text

2. Pursuant to Section 76 of the Act, I hereby amend the Murray Mallee Regional Plan to make the following minor or operational amendments:
- Amend the spatial layers by transferring all land (or portions of land) identified in the 'Future Greenfield Supply—in EFPA' layer into the 'Future Greenfield Growth Area' layer and then delete the 'Future Greenfield Supply—in EFPA' layer.
  - In the 'Layers' legend of the spatial mapping, for the 'Future Greenfield Growth Area' layer, replace the description 'Future greenfield growth areas located outside of the EFPAs' with 'Land identified for future greenfield growth'.
