1. The decision of the Governor under section 48 of the Development Act 1993, to approve the development of a marina facility and the creation of residential allotments and sites for various commercial, public boating and commercial fishing facilities, immediately north of the township of Wallaroo on the Yorke Peninsula, was published in the *Gazette* on 11 March 1999.

2. An amended proposal to develop the marina and other facilities and the creation of residential allotments has been under consideration under Division 2 of Part 4 of the Development Act 1993.

3. The proposed amendments of the development approved by the Governor on 11 March 1999 are:

Decision

PURSUANT to section 48 of the Development Act 1993, the Development Assessment Commission, as delegate of the Governor, grants the following development authorisations for the amended proposal submitted by Christalmede Pty Ltd for the development of a marina facility and the creation of residential allotments and sites for various commercial, public boating and commercial fishing facilities, immediately north of the township of Wallaroo on the Yorke Peninsula, subject to conditions:

1. *Development Approval* for the excavation/formation of land for the following purposes:

- entrance channel (that part not already approved), marina basin and waterways (including the installation of edge treatments and stormwater discharge outlets);
- public boat ramp facility;
- commercial fishing site at the entrance facility;
- commercial shopping site adjacent to the marina facility;
- hotel/motel/restaurant complex site adjacent to the marina facility;
- retirement village; and
- residential development,

subject to the following conditions:

Conditions for Development Authorisation

- (1) The works must be carried out as shown on plans in the application (Drawings Titled Figure 2.2 dated 10 January 2001, Figure 2.3 dated 7 July 1998 and Figure 2.4 dated 16 July 1998), except where varied by conditions described below.
- (2) Construction activities must be suitably managed to minimise and/or mitigate impacts on the community (especially noise and dust) and the natural environment as far as practicable.
- (3) The land to be used for land-based allotments must be formed to prevent stormwater flows entering into the waterways (as outlined in section 4.5 of the Second Amendment to the Assessment Report). To the extent that this is not practicable, stormwater must not be released into the waterways unless treated in accordance with the EPA Stormwater Pollution Prevention Codes of Practice.
- (4) Existing stormwater drains affected by the construction work must be incorporated into the design of the entrance facility or suitably redirected, to the reasonable satisfaction of the District Council of the Copper Coast.

- (5) A Soil Erosion and Drainage Management Plan to address the control of run-off from earthworks (to ensure water quality is not detrimentally affected) must be prepared by the proponent and approved by the Environment Protection Authority, prior to construction commencing, and the works must be undertaken in accordance with that plan.
- (6) Further engineering designs for edge treatments must be prepared, to the reasonable satisfaction of Transport SA, to identify suitable locations for stormwater discharge outlets. Edge treatments and other waterway related structures must be independently certified by a registered engineer to the reasonable satisfaction of Transport SA, prior to the commencement of construction.
- (7) The proponent must ensure that allotment owners and the District Council of the Copper Coast (which will be responsible for the maintenance of edge treatments) are made aware of the possibility that the sill level of waterways may be over topped by water in extreme events.
- (8) The closure of Heritage Drive for excavation of the remainder of the entrance channel must only occur once the construction and opening of Heritage Way for traffic is completed.
- (9) All existing services (including sewerage, water and power supplies) affected by the cutting of Heritage Drive for the construction of the entrance channel must be relocated to the reasonable satisfaction of the relevant authorities.
- (10) Transport routes for the delivery of construction materials and equipment must be selected to the reasonable satisfaction of the District Council of the Copper Coast.
- (11) Appropriate navigational aids must be erected in prominent locations, in consultation with Transport SA, prior to use of the facility for boating purposes.
- (12) A monitoring program must be prepared and implemented, in accordance with the requirements of the EPA and the Amendment to the Assessment Report (Section 6), to the reasonable satisfaction of the Development Assessment Commission, prior to operation of the waterways.
- (13) Any work that constitutes building work under the Development Act 1993, must be certified by a private certifier or the District Council of the Copper Coast, as complying with the Building Rules prior to any building work commencing, unless such work has been independently certified under Condition (6).
- (14) The waterways must not be flooded unless and until the proponent and the District Council of the Copper Coast have entered into a binding agreement, to the satisfaction of the Development Assessment Commission, which specifies the party responsible for the management, maintenance and monitoring of water quality standards, waterway depth and safe navigability.
- (15) Water quality standards in the marina basin and waterways must meet the criteria for secondary contact recreation, public amenity and the maintenance of marine aquatic ecosystems. (Note: This includes activities such as wading, boating and fishing, where some contact with the water may occur, but the probability of bodily immersion or the intake of water into the body is minimal).
- (16) The filling of land must be conducted under a suitable compaction testing program, to the reasonable satisfaction of District Council of the Copper Coast.
- (17) Undeveloped allotments must be left in a neat and tidy condition, with soil surfaces stabilised to minimise erosion.

NOTES TO THE APPLICANT:

1. The Environment Protection Authority will require approved monitoring programs (or modifications to existing programs) to satisfy the Authority's licensing requirements for earthworks drainage and dredging. In addition the proponent will need to adopt or comply with the following:

- Environment Protection (Marine) Policy 1994;
- Draft Environment Protection (Water Quality) Policy; and
- Stormwater Pollution Prevention Codes of Practice.

2. The proponent, and District Council of the Copper Coast in the long-term, must comply with the Public and Environmental Health Act 1987, in regard to the maintenance of suitable water quality within the marina basin to protect public health and amenity.

3. Pursuant to the Harbors and Navigation Act 1993, the proponent will need to gain a registered, long-term lease (to occupy the site for construction purposes) for the area associated with the entrance works (i.e. additional to those recently granted approval for) from the Minister for Transport and Urban Planning, prior to the start of construction in this area. Existing lease arrangements should be incorporated into the new lease.

4. It is recommended that the District Council of the Copper Coast should consider the enactment of by-laws to manage activities associated with the entrance channel and waterways to ensure safe navigation and to protect water quality.

5. The proponent, and all subsequent agents, such as construction crews, must be conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Division of Aboriginal Affairs (DEHAA) in the event that archaeological items (especially skeletal material) are uncovered during earthmoving.

2. *Development Approval* for the establishment of the marina facility (including the ferry landing) and for the commercial fishing berths, unloading wharf area, public boat ramp (including associated car parking and access), boat repair yard, boat refuelling facility and marine toilet pump-out/treatment facility located at the proposed entrance facility, in accordance with the plans comprising the application, subject to the following conditions:

Conditions for Development Authorisation

- (1) Access systems for all floating boat moorings must be capable of adjustment or be readily adaptable to projected long-term sea level rise.
- (2) The design of the public boat ramp facility must include a hard stand and wash down area. The finished level must be determined to the satisfaction of the District Council of the Copper Coast and take account of coastal flooding and the slope of the ramp. Final design and construction of the boat ramp facility must ensure any run-off or accidental spills are prevented from entering the basin without suitable prior treatment to reduce pollutants.
- (3) A set-back distance of 2 m from the top of waterway edge treatments must be provided for the construction of further coastal protection works if required in the future.
- (4) The boat refuelling dock and marine toilet pump-out facility must be designed to meet EPA, South Australian Health Commission and Transport SA requirements.
- (5) Plans detailing sealed line-marked car parking spaces, driveways and associated manoeuvring spaces must be submitted and approved by District Council of the Copper Coast, prior to works commencing. A minimum of 115 parking spaces for the marina facility, 60 car/trailer parking spaces for the public

boat ramp facility and 15 parking spaces for the commercial fishing berths must be provided. All single car parking spaces must have a minimum dimension of 5.5 m deep x 2.6 m wide.

- (6) The proponent must ensure satisfactory oil spill and fire fighting facilities and contingencies, determined in consultation with Transport SA (Marine Safety Section) and the Metropolitan Fire Service (MFS) and/or the Country Fire Service (CFS) respectively, are in place prior to commencement of operation of the marina.
- (7) The waterways must not be flooded unless and until the proponent and the District Council of the Copper Coast have entered into a binding agreement, to the satisfaction of the Development Assessment Commission, which specifies the party responsible for the management, maintenance and monitoring of the activities and impacts of the marina facility, commercial fishing berths, unloading wharf area, public boat ramp, boat repair yard, boat refuelling facility and marine toilet pump-out/treatment facility.
- (8) Further engineering designs for marina and commercial moorings (including the ferry landing), the unloading wharf area, the public boat ramp (including associated car parking and access), the boat repair yard (including travel lift jetties), the boat refuelling facility and marine toilet pump-out/treatment facility must be prepared and independently certified by a registered engineer, to the reasonable satisfaction of Transport SA, prior to the commencement of construction.
- (9) No building proposed to be used as a shop, office or store shall be erected within the entrance facility without further approval from the relevant authority.
- (10) Any work that constitutes building work under the Development Act 1993, must be certified by a private certifier or the District Council of the Copper Coast, as complying with the Building Rules prior to any building work commencing, unless such work has been independently certified under Condition (8).

NOTES TO THE APPLICANT:

1. Development authorisation (for buildings) is still required for structures associated with the marina facility, commercial fishing berths, unloading wharf area, public boat ramp, boat repair yard, refuelling facility and marine toilet pump-out/treatment facility. Detailed design plans and cross-sections need to be provided for consent.

2. Development authorisation (for the division of land) is still required for the creation of public and commercial allotments at the entrance facility. A detailed description of service infrastructure, easement and open space reserve requirements needs to be provided as part of a subsequent land-division application. It is intended that any land-division approvals be conditional on no Certificates of Title being issued until management, maintenance and monitoring responsibilities are appropriately identified and allocated to the satisfaction of the Minister for Transport and Urban Planning.

3. Pursuant to the Harbours and Navigation Act 1993, the proponent would need to gain a registered, long-term lease (for the commercial fishing berths) and Freehold Title (for commercial activities) for the area associated with the entrance works from the Minister for Transport and Urban Planning, prior to the start of construction in this area. Existing lease arrangements should be incorporated into the new lease.

4. The Environment Protection Authority will require approved monitoring programs to satisfy the Authority's licensing requirements for the operation of the marina facility (for 50 or more berths). As part of licensing the proponent may need to prepare a Waste Management Plan, which should encompass the marina/berthing facilities, boat ramp facility and commercial components. In addition the proponent would need to adopt or comply with the following:

- Environment Protection (Marine) Policy 1994 (by following the Best Practice Guidelines for Waste Reception Facilities at Ports, Marinas and Boat Harbours in Australia and New Zealand);
- Draft Environment Protection (Water Quality) Policy; and
- Stormwater Pollution Prevention Codes of Practice.

5. The marina mooring structures must be designed in accordance with the Australian Standard AS3962 – 1991 Guidelines for Design of Marinas.

6. The public boat ramp facility must be generally designed in accordance with the South Australian Boating Advisory Committee's Guidelines for Planning, Design and Construction of Boat Launching Facilities.

7. District Council of the Copper Coast by-laws should be enacted to manage activities associated with the boat ramp, boat repair yard, refuelling facility and marine toilet pump-out facility.

8. If foreign vessels are allowed to berth in the marina the proponent would need to consult with Transport SA (Marine Safety Section) to address any requirements of the Australian Quarantine Inspection Service (AQIS) and Australian Customs Service.

3. *Development Approval* for the division of land into allotments for residential and public uses and the construction of associated roads, in accordance with the plans comprising the application and subject to the following conditions:

Conditions for Development Authorisation

- (1) A Soil Erosion and Drainage Management Plan to address the control of run-off from earthworks and hard surfaces (to ensure water quality is not detrimentally affected during construction and from the completed development) must be prepared by the proponent and approved by the Environment Protection Authority, prior to the construction of roads, engineering services and reserves commencing, and the works must be undertaken in accordance with that plan.
- (2) Road and associated kerbing must be designed and constructed to avoid stormwater flows entering into the waterways by directing flows to inland disposal areas, or where this is proven not to be possible, to ensure adequate treatment of stormwater prior to any release into the waterways (in accordance with the objectives outlined in section 4.5 of the Second Amendment to the Assessment Report).
- (3) Further detailed engineering designs that provide a range of measures for managing stormwater run-off (having particular regard to the EPA Codes of Practice) must be prepared, to the reasonable satisfaction of the Development Assessment Commission, for inclusion in an EPA approved Soil Erosion and Drainage Management Plan.
- (4) A set-back distance of 2 m from the top of waterway edge treatments must be provided for the construction of further coastal protection works if required in the future.
- (5) The proponent must satisfy SA Water Corporation's financial and easement requirements for the provision of an adequate water supply, prior to construction commencing.
- (6) Designs for the proposed effluent disposal system for the development site and connection to the town's STED scheme must be finalised and implemented, prior to application to the Registrar-General for the issue of new Certificates of Title.
- (7) The construction of Stage 2 must not commence unless and until the proponent and the District Council of the Copper Coast have entered into a binding agreement, to the reasonable satisfaction of the Development Assessment Commission, which specifies arrangements for the expansion of the town's effluent lagoons to cater for the increased demand from Stage 2 of the development. (Note: The proponent must consult with District Council of the

Copper Coast and the South Australian Health Commission (Waste Water and Control) to ensure suitable standards and facilities (with adequate capacities) are adopted and located for effluent disposal, including the potential long-term demand from the possible commercial facilities, the Hotel/Motel and Retirement Village).

- (8) Road, drainage, footpath and intersection designs (i.e. engineering construction plans) must be finalised in accordance with the requirements of Transport SA and the District Council of the Copper Coast, prior to construction commencing. Drainage arrangements for existing roads (esp. Alford Road) must not be altered unless agreed by the owner of the road. Road and drainage designs must include water table levels, drainage inverts and pavement details. The roads and drainage works must be built in accordance with these designs.
- (9) There must be no direct access onto Alford Road from adjoining allotments where a buffer reserve (i.e. 0.5 m in width) must be created.
- (10) Final road names shall be to the satisfaction of the District Council of the Copper Coast.
- (11) The proponent must provide undergrounded public lighting, power supply, water supply, television antenna and telephone supply to each allotment in accordance with, and to engineering design standard plans approved by the electricity, mains water and telephone public utility authorities.
- (12) Any additional filling of land to that approved in development approval number 1 must be conducted under a suitable compaction testing program to the reasonable satisfaction of the District Council of the Copper Coast.
- (13) The proponent should develop and landscape all proposed reserves, to the satisfaction of The District Council of the Copper Coast (Note: This is in lieu of the full quota of open space (or a cash contribution) for the residential land division component not being fulfilled).
- (14) Binding legal arrangements (as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar General for the issue of new Certificates of Title, to specify design standards and to set out responsibilities for the privately owned land within the development to comply with approvals for the site and for the avoidance of pollution of waterways abutting residential allotments. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.
- (15) Binding legal arrangements (e.g. easements, encumbrances, charge-back arrangements etc. as appropriate) as between the proponent and allotment owners must be put in place, prior to application to the Registrar General for the issue of new Certificates of Title, to ensure financial and management responsibilities related to the maintenance of edge treatments, the design and appearance of structures and the installation of future coast protection works are clearly allocated. These arrangements must be to the reasonable satisfaction of the Development Assessment Commission.
- (16) The proponent and the District Council of the Copper Coast must enter into a binding agreement, to the reasonable satisfaction of the Development Assessment Commission, which specifies the party responsible for the management, maintenance and monitoring for infrastructure/services/roads, open space reserves and for the stormwater drainage and detention system, prior to application to the Registrar General for the issue of new Certificates of Title.
- (17) The District Council of the Copper Coast must be given seven days notice, prior to the commencement of works, and be provided with the name and contact facilities for the person responsible for co-ordinating site works covered by this approval.

NOTES TO THE APPLICANT:

1. Two copies of certified survey plans, as required under the Real Property Act, must be lodged with the Development Assessment Commission for the issue of a certificate of title, prior to titles for residential allotments being granted. The plans must show all easements and reserves.

2. The reuse of stormwater collected in any holding ponds to irrigate reserves and landscaped areas should be further investigated as a viable management option.

3. Information regarding estimated traffic movements will be required for finalising road designs to comply with condition 10.

4. The proponent, and all subsequent agents, such as construction crews, must be fully conversant with the provisions of the Aboriginal Heritage Act 1988, particularly the requirement to immediately contact the Division of Aboriginal Affairs (DEHAA) in the event that archaeological items (esp. skeletal material) are uncovered during earthmoving.

5. It is recommended that the District Council of the Copper Coast should consider the enactment of by-laws to manage activities associated with the residential development (public access and recreation in the Coastal Reserve) and reserves (including stormwater holding ponds).

6. It is recommended that the District Council of the Copper Coast should consider revising the policies in the relevant Development Plan to reflect any development approved by the Governor.

7. The proponent must comply with the Public and Environmental Health Act 1987, in regard to the maintenance of suitable water quality within stormwater holding ponds to protect public health and amenity.

8. To comply with Condition (18) it is recommended that a Waste Management Plan for the residential development (inc. the stormwater management system) should be prepared, in consultation with the District Council of the Copper Coast and the EPA, prior to the consideration of applications for dwellings.

9. It is recommended that the District Council of the Copper Coast should consider the preparation and implementation of a Management Plan (as required under the Local Government Act 1934, as amended) for the Coastal Reserve immediately north of the proposed development to manage off-site impacts (to include the control of access, potential disposal of run-off, minimising fire risk, removal of pest plant and animals, provision of walking tracks etc.).

10. It is recommended that the District Council of the Copper Coast would need to ensure all external run-off (excluding that from the Caravan Park) is redirected away from the site and suitably treated and disposed of, in consultation with the EPA.

11. If the marina facility is to be further divided into allotments then appropriate arrangements should be put in place, prior to the issue of titles, to clearly regulate the activities of the marina to avoid detrimental impacts on water quality and adjacent amenity (inc. avoidance of water pollution, litter, oil/fuel spills, navigability) and, where possible, allocate responsibility for remedial measures.

12. Further design and infrastructure/service plans (i.e. subject to separate applications in the future) would be required should further development approval be sought for the Retirement Village, Hotel/Motel/Restaurant complex, Commercial Fishing and Shopping Areas.

PURSUANT to section 48 (7) of the Development Act 1993, the Governor has specified that the matters of protection of water quality and stormwater management relevant to these authorisations are matters in relation to which the Governor may vary or revoke conditions of these authorisations or attach new conditions to them.

Given under my hand at Adelaide, 8 March 2001.

Individual giant crab catch quota system

14B. (1) In this regulation—

"**giant crab**" means giant crab (*Pseudocarcinus gigas*);

"**giant crab quota**"—

(a) in relation to a licence in respect of a rock lobster fishery—means the maximum number of kilograms of giant crab that may be lawfully taken by the holder of the licence during a licence period, being the product of—

(i) the unit entitlement of that licence; and

(ii) the unit value for the fishery and that licence period,

subject to any variation of the giant crab quota of the licence applying during that licence period;

- (b) in relation to a licence in respect of the Miscellaneous Fishery—has the same meaning as in regulation 11 of the *Scheme of Management (Miscellaneous Fishery) Regulations 2000*;

"unit entitlement"—

- (a) in relation to a licence in respect of a rock lobster fishery—means the number of giant crab units for the time being allocated to the licence;
- (b) in relation to a licence in respect of the Miscellaneous Fishery—has the same meaning as in regulation 11 of the *Scheme of Management (Miscellaneous Fishery) Regulations 2000*;

"unit value" means the number of kilograms of giant crab determined by the Director to be the value of a giant crab unit for a rock lobster fishery and a licence period.

(2) For the purposes of the formula set out in subregulation (3)(a), the following fishing periods are prescribed:

- (a) in relation to the Northern Zone Rock Lobster Fishery—

where—

- A is the number of giant crab units to be allocated to the licence (rounded up to two decimal points)
- B is the aggregate number of kilograms of giant crab taken pursuant to the licence during prescribed fishing periods (as recorded on completed returns lodged under regulation 15 before 31 May 2001)
- C is the aggregate number of kilograms of giant crab taken pursuant to licences in respect of the fishery specified in Schedule 4 during prescribed fishing periods (as recorded on completed returns lodged under regulation 15 before 31 May 2001);
- (b) if the aggregate number of giant crab units allocated to licences in respect of a rock lobster fishery under paragraph (a) is less than 350, an additional number of units equal to the difference between the aggregate number allocated under that paragraph and 350 may be allocated to those licences, and in that case the conditions of each licence must be varied so as to increase the unit entitlement of the licence by a number of units that bears to the aggregate number of units to be allocated under this paragraph the same proportion as the number of units allocated to that licence under paragraph (a) bears to the aggregate number of units allocated to licences in respect of the fishery under that paragraph;
- (c) during the licence period ending on 30 June 2002, the conditions of each licence in respect of a rock lobster fishery endorsed with a condition fixing a giant crab quota on the licence must be varied so as to reduce the quota of the licence for that licence period by one kilogram for each kilogram of giant crab taken pursuant to the licence during the period commencing on 1 July 2001 and ending on 14 January 2002 (as recorded on completed returns lodged under regulation 15);

- (e) the Director must, on the commencement of each licence period, determine the number of kilograms of giant crab that is to be the value of a giant crab unit for a rock lobster fishery and the licence period;

- (f) on application made to the Director by the holders of any two licences in respect of the same rock lobster fishery endorsed with conditions fixing giant crab quotas on the licences, the conditions of the licences may be varied so as to increase the unit entitlement of one of the licences and decrease the unit entitlement of the other licence by a corresponding number of units;

- (i) if the catch exceeded the quota by not more than 20 kilograms of giant crab—by one kilogram for each kilogram in excess of the quota; or
- (ii) if the catch exceeded the quota by more than 20 kilograms but not more than 50 kilograms—by two kilograms for each kilogram in excess of the quota;
- (j) any variation of a giant crab quota made under paragraph (i) must be expressed to apply only for the licence period during which the variation is made;

- (k) unit entitlements and giant crab quotas must not be varied except as provided by this regulation or the *Scheme of Management (Miscellaneous Fishery) Regulations 2000*.
- (4) If—
- (a) a court convicts the holder of a licence in respect of a rock lobster fishery of an offence of contravening a condition of the licence imposing a giant crab quota on the licence; and
- (b) the conduct constituting the offence involved the taking of more than 50 kilograms of giant crab in excess of the quota,

the court must make an order requiring the Director to vary the conditions of the licence so as to reduce the giant crab quota of the licence for three licence periods following the conviction by one kilogram for each kilogram in excess of the quota for the licence period during which the offence was committed.

(5) An application under subregulation (3)(f), (g) or (h) must be made in a manner and form approved by the Director.
