Criteria for Assessment of Applications

Winning bidders will be selected on the basis of the 5 year work program bid for the area of application. The work program must include a statement of exploratory operations the applicant proposes to carry out in the first 5 year licence term. It is obligatory that at least one exploration well will be included in the 5 year work program.

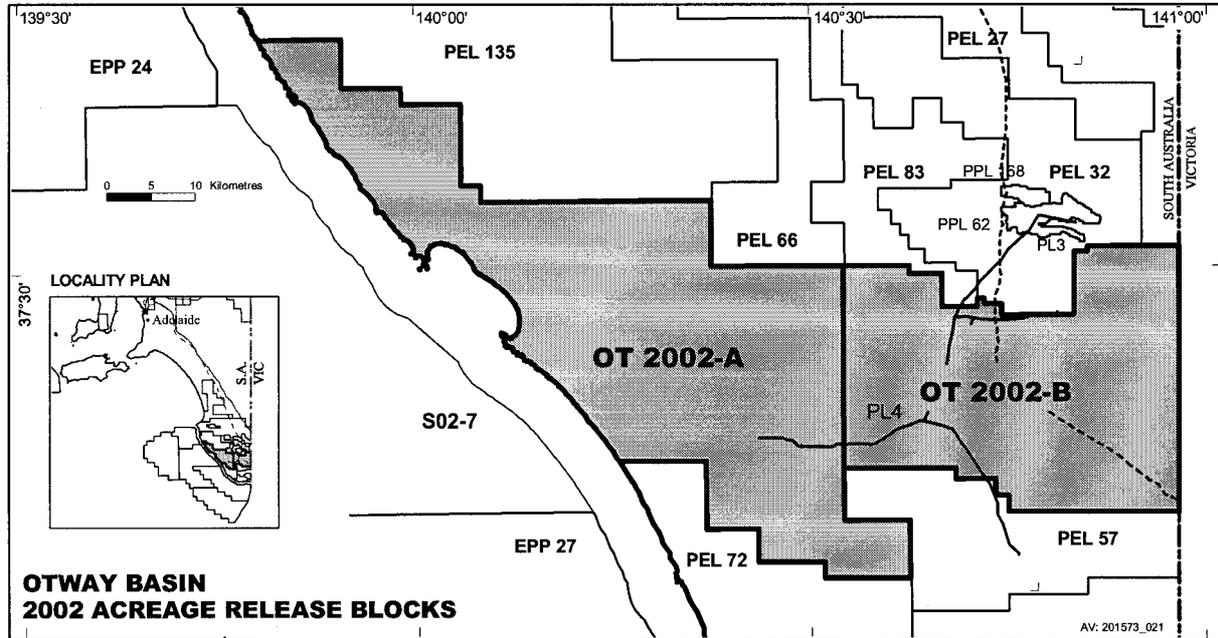

Bids will be assessed taking account of the criteria listed below. It is important to note that the timing of well drilling and seismic acquisition will be taken into account. The most important criteria for assessment of OT 2002 (A-B) work programs are:

- the number of exploration wells to be drilled, their timing and anticipated targets;
- the extent to which proposed wells are supported by seismic data;
- the number of years the applicant is prepared to guarantee the program;
- adequacy of financial resources and technical expertise available to the applicant; and
- the applicant's past performance in fulfilling work program commitments elsewhere in Australia.

Secondary criteria that may be taken into account are:

- the amount and nature of seismic surveying to be carried out and its timing; and
- other data acquisition and seismic reprocessing to be carried out.

In addition to the above criteria, where bids are similar, the benefits of the introduction of new explorers into the area (including intention with regard to establishing an office in South Australia) may be taken into account. In the case of cascading bids, (i.e. multiple or hybrid bids by one applicant or joint venture), only the highest bid will be considered.

Dated 27 September 2002.

B. A. GOLDSTEIN, Director Petroleum, Office of Minerals and Energy Resources,
Delegate of the Minister for Mineral Resources Development.
