4. No construction activities or building works shall commence until a heritage survey has been completed to identify any Aboriginal sites, objects or remains in the site area, and monitoring shall be undertaken during construction to enable the development to proceed without a breach of the Aboriginal Heritage Act 1988. 8. The wastewater collection and treatment system shall be designed to ensure that the general obligations of the Environment Protection (Water Quality) Policy 2003 are met, and to ensure that effluent does not overflow or escape from drains, pipes, sumps, tanks, storage/treatment basins into any watercourse, or into stormwater drains which do not drain into the effluent collection, treatment and disposal system, except where the effluent complies with criteria in the above policy.

9. In accordance with commitments by the applicant, wastewater shall not be stored in open storage ponds until it is first treated to reduce the potential for odours to occur.

10. The applicant shall ensure that stormwater, which does not comply with the Environment Protection (Water Quality) Policy 2003 criteria, is not discharged from the site without prior effective treatment.

11. Noise from the development shall be in accordance with the following:

Construction Activities—Mondays to Saturdays:

- (a) not exceed 52 dB(A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property;
- (b) not exceed 45 dB(A) between the hours of 6 a.m. and 7 a.m. measured and adjusted at the nearest existing residential property;

- (c) shall be in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (d) site deliveries and other noisier construction activities shall be scheduled to minimise noise impacts;
- (e) all other aspects of construction activities shall be undertaken in accordance with the Environmental Management and Monitoring Plan.

Operation of the development:

- (a) shall not exceed 52 dB (A) between the hours of 7 a.m. and 10 p.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (b) shall not exceed 45 dB (A) between the hours of 10 p.m. and 7 a.m. measured and adjusted at the nearest existing residential property in accordance with the Environment Protection (Industrial Noise) Policy 1994;
- (c) a short-term typical maximum noise level of 60 dB (A) when measured at the nearest existing residential property.

12. The proponent shall, subject to obtaining the landowner's consent in relation thereto, install, operate and maintain frost fans on the property located north of the proposed development site either in accordance with the recommendations in the Development Report and assessed in the Acoustic report on frost fan impacts and in accordance with the Environment Protection Authority's standards for their operation, siting and distance from potential receptors, or in accordance with any alternative arrangement negotiated with the landowner. If the landowner refuses consent for the establishment of frost fans on the property located to the north of the proposed development, the proponent is excused from compliance with this condition.

13. Landscaping of the site shall commence prior to construction of the proposed major development, and when established must be maintained in good health and condition at all times. A plant must be replaced if or when it dies or becomes seriously diseased within the first growing season after the plant dies or becomes seriously diseased.

14. In accordance with commitments by the applicant, building walls up to 3 m shall be clad in colorbond 'ironstone' (or similar), and walls above 3 m shall be clad in colorbond 'paperbark' (or similar).

15. All lighting shall be directed and shielded in such a way as to prevent glare from the site, and any lighting that is not in use for operational or security reasons shall be switched off.

16. In accordance with EPA recommendations, no trucks or heavy vehicles shall access the site from the portion of Light Pass Road, south of the access point for the proposed major development.

17. The temporary concrete batching plant for on-site construction activities and associated infrastructure shall be decommissioned and removed from the site no later than 1 August 2005.

18. The applicant shall, prior to the commencement of operations, prepare an Irrigation Management Plan to the satisfaction of the Environment Protection Authority to demonstrate that the proposed development will:

- (a) minimise the risk of polluting surface and groundwater resources by preventing excessive wastewater runoff or infiltration;
- (b) minimise soil degradation and damage to crops by using sustainable irrigation application rates, based on soil limitations (determined by a soil survey), crop requirements and limiting wastewater constituents;
- (c) prevent environmental nuisance by identifying wastewater pre-treatment requirements and employing suitable separation distances for irrigation;
- (d) prevent public and animal health impacts by using appropriate irrigation equipment and implementing training and awareness programs for staff;
- (e) maximise organic carbon, nutrient and salt removal by selecting suitable land, viable and tolerant crops and suitable cropping practices;

- (f) maintain a 50 m buffer between irrigation areas and the Council stormwater collection system.

19. The Irrigation Management Plan shall contain contingency measures for the disposal of any excess wastewater that cannot be irrigated during the winter periods.

NOTES TO APPLICANT

- Pursuant to Development Regulation 64, the applicant is advised that the Barossa Council or private certifier conducting a building rules assessment must:

An amended Assessment Report may also be required to assess any new issues not covered by the original Assessment Report and a decision made by the Governor pursuant to Section 48 of the Development Act 1993.
- It is recommended that the applicant finalise the required water licence arrangements pursuant to the Water Resources Act 1997, for the construction of the proposed water storage dam and subsequent re-use of water, prior to construction of the proposed major development (in order for operations to proceed). The applicant is also advised to submit information on the water licence arrangements to Planning SA, together with final details on the design of the stormwater dam and associated release mechanism(s) and infrastructure.
- The proponent is advised of the General Environmental Duty under section 25 of the Environment Protection Act 1993, which requires that a person must not undertake any activity, which pollutes, or may pollute; without taking all reasonable and practical measures to prevent or minimise harm to the environment.

NATURAL RESOURCES MANAGEMENT ACT 2004

Notice of Authorisation to Take Water

PURSUANT to section 128 of the Natural Resources Management Act 2004, I, John David Hill, Minister for Environment and Conservation, hereby authorise the taking of roof runoff (surface water) from all Surface Water Prescribed Areas within the State of South Australia for the purposes of commercial (but not irrigation) use and industrial, environmental or recreational use, subject to the conditions specified in Schedule A.

SCHEDULE A

1. Surface water taken pursuant to this authorisation may only be used for one or more of the purposes described above and no other purpose, unless otherwise authorised.

2. Surface water taken pursuant to this authorisation can only be collected where:

- (a) the volume of water deemed to be collected from the connected roof area is equal to or less than 500 kilolitres per annum;
or
(b) the volume of water deemed to be collected from the connected roof area is determined as follows:

$$\begin{array}{r} \text{Potential Estimated Average} \\ \text{Annual Capture} \\ \text{Amount (kilolitres)} \end{array} = \frac{\begin{array}{r} \text{roof area} \\ \text{(in square metres)} \end{array} \times \begin{array}{r} \text{average annual rainfall for the} \\ \text{relevant location (in millimetres)} \end{array}}{1\ 000}$$

On the basis that 1 mm of rain per square metre of roof yields 1 L of water and using the relevant map of those appended as Attachments 1-6 to determine the average annual rainfall.

3. All water taken pursuant to this authorisation must be directed to closed water storage facilities (holding tanks).

4. Any water collected pursuant to this authorisation that overflows from a holding tank(s) must be released into the environment through the existing surface water drainage arrangements and must not be recaptured or redirected, unless otherwise authorised.

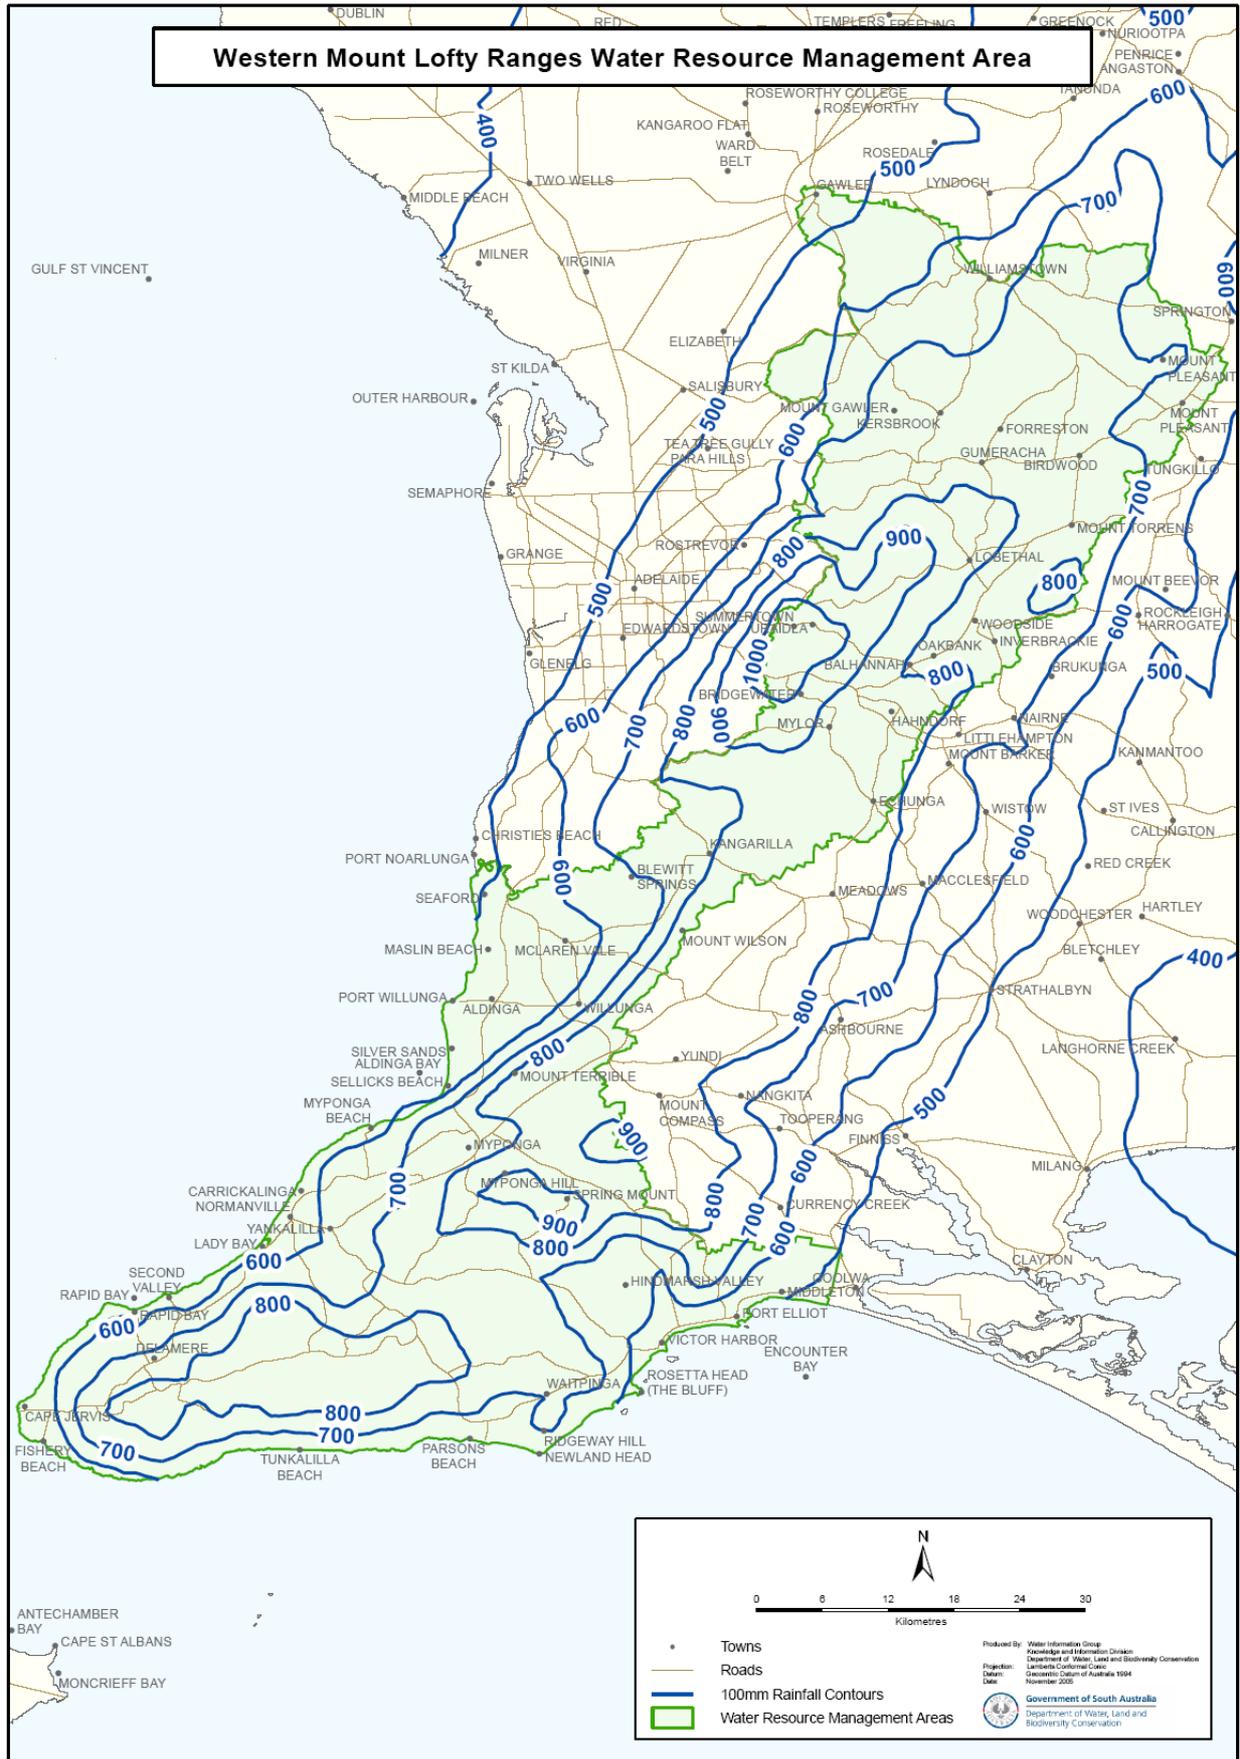

5. This authorisation will not apply where the Minister determines that the collection of rainwater from a particular roof by a person in a particular Surface Water Prescribed Area has or will have a detrimental effect on the ability of the holders of water licences in the same Surface Water Prescribed Area to exercise their rights in respect of the allocations endorsed on their licences and the Minister notifies the person in writing of that determination.
