## NATURAL RESOURCES MANAGEMENT ACT 2004

*Revocation of Notice of Authorisation to Take Water*

PURSUANT to section 128 (9) of the Natural Resources Management Act 2004 (the Act), I, Paul Caica, Minister for Environment and Conservation in the State of South Australia and Minister to whom the administration of the Act is committed, revoke the Notice of Authorisation to Take Water dated 9 March 2006 and published in the *Government Gazette* (page 906) on 16 March 2006.

Dated 21 February 2011.

PAUL CAICA, Minister for Environment and Conservation

## NATURAL RESOURCES MANAGEMENT ACT 2004

*Notice of Authorisation to Take Water*

PURSUANT to section 128 of the Natural Resources Management Act 2004, I, Paul Caica, Minister for Environment and Conservation, hereby authorise the taking of roof runoff (surface water) from all Surface Water Prescribed Areas within the State of South Australia for the purposes of commercial (but not irrigation) use and industrial, environmental or recreational use, subject to the conditions specified in Schedule A.

## SCHEDULE A

1. Surface water taken pursuant to this authorisation may only be used for one or more of the purposes described above and no other purpose, unless otherwise authorised.

2. Surface water taken pursuant to this authorisation can only be collected where the volume of water deemed to be collected from the connected roof area is equal to or less than 500 kilolitres per annum.

3. The volume deemed to be collected from the connected roof area is determined as follows:

$$\begin{array}{rcl} \text{Potential Estimated Average} & & \text{roof area} & & \text{average annual rainfall for the} \\ \text{Annual Capture} & = & \text{(in square metres)} & \times & \text{relevant location (in millimetres)} \\ \text{Amount (kilolitres)} & & & & \\ & & & & \hline & & & & 1\ 000 \end{array}$$

on the basis that 1 mm of rain per m<sup>2</sup> of roof yields 1 litre of water and using the relevant map of those appended as Attachments 1-7 to determine the average annual rainfall.

4. All water taken pursuant to this authorisation must be directed to closed water storage facilities (holding tanks).

5. Any water collected pursuant to this authorisation that overflows from a holding tank(s) must be released into the environment through the existing surface water drainage arrangements and must not be recaptured or redirected, unless otherwise authorised.

6. This authorisation will not apply where the Minister determines that the collection of rainwater from a particular roof by a person in a particular Surface Water Prescribed Area has or will have a detrimental effect on the ability of the holders of water licences in the same Surface Water Prescribed Area to exercise their rights in respect of the allocations endorsed on their licences and the Minister notifies the person in writing of that determination.

This authorisation will commence on the date below and will remain in effect for a period of five years unless earlier varied or revoked.

Dated 21 February 2011.

PAUL CAICA, Minister for Environment and Conservation
