MINING ACT 1971

NOTICE is hereby given in accordance with Regulations 86 (1), (3), (4) and (7) of the Mining Regulations 2011, determining the reporting periods and minimum information required to be provided in a compliance report for a mineral lease and any associated miscellaneous purposes licence for metallic and industrial minerals (excluding extractive minerals, coal and uranium).

1. Compliance Reports

The compliance report must summarise the lease or licence holders own compliance monitoring activities, and provide evidence that mining operations are compliant with the approved program for environment protection and rehabilitation (PEPR), mineral lease and/or miscellaneous purposes licence and the Mining Act 1971.

The compliance report will replace the mining and rehabilitation compliance report formerly required in some lease or licence conditions.

2. Requirement for Submission and Reporting Period

Unless otherwise agreed by the Director Mining Regulation in writing:

• A compliance report is required for all mineral leases and any associated miscellaneous purposes licences.
• The reporting period is one year, based on the anniversary of the lease or licence grant or the part of the final year if the lease or licence has been surrendered or cancelled.
• The period after the reporting period to submit the compliance report is two months.
3. Content of Compliance Report

3.1 Required elements of Regulation 86 (4)

The compliance report must include all elements of Regulation 86 (4) (a–i).

If the mine has been closed and all rehabilitation was completed during the previous reporting period, only relevant sections of Regulation 86 (4) are required to be addressed.

3.2 Other Information Required

The information listed in Sections 3.2.1 to 3.2.11 must be included.

3.2.1 Identification

The report must clearly identify:

- tenement number(s)
- name of the mine operation
- general location details
- name(s) of the mine owner and mine operator(s)
- reference and approved date of relevant PEPR being reported against
- person accepting responsibility for the report
- dates of the reporting period for the report
- date of preparation of the report.

3.2.2 Changes to Mining Operations and Emerging Environmental Hazards

Describe any changes made to the mining operations since the previous compliance report or current approved PEPR.

If any changes to the site footprint have occurred since the current approved PEPR, include a plan of the current site extent of the mine operations.

Describe any new knowledge about the environment at the mine operation if this is different from the current approved PEPR.

If any changes to the mining operation or new knowledge has been obtained about the environment, an analysis of potential new environmental risks in accordance with Regulation 86 (4) (h) must be included.

If a new risk is identified that may materially alter the existing approved outcomes or criteria (including the introduction of new outcomes to be achieved), the report must outline a plan to review the PEPR and/or apply for a change to the lease conditions.

3.2.3 Operations Summary Table

Provide a table (as per Table 1) and a scale plan showing disturbed and rehabilitated areas for all tenements associated with the mining operation.

3.2.4 Rehabilitation and Environmental Management Activities

Details to be provided must include:

- the amount of land disturbed;
- vegetation cleared;
- new measures implemented to avoid or control environmental impact;
- revegetation or rehabilitation earthworks conducted;
- evidence (by using closure and rehabilitation criteria in the current approved PEPR) of the effectiveness of rehabilitation being progressively undertaken; and
- any problems or potential improvements learned from previous rehabilitation.

An assessment of risks that rehabilitation may or may not be achieved as planned must be included. If a risk of failure is identified, detail new strategies to be undertaken to achieve environmental outcomes in the current approved PEPR.

3.2.5 Ore Reserves and Mine Life

A summary must be included of any new delineation or exploration drilling activities on or off the lease, review of reserves, or other potential sources of ore (e.g. from nearby mines) that have a significant effect on the future production levels or mine life.
3.2.6 Compliance with Outcomes

This section must include a clear statement that operations were, or were not, compliant with each environmental outcome (for construction, operation and post mine closure) stated in the lease or licence conditions and the current approved PEPR. The statement must be supported by a summary of compliance criteria data that clearly demonstrates the conclusion that the outcome was (or was not) fully achieved.

Where native vegetation has been approved for clearance, the compliance report must include:

- a reconciliation between the approved maximum clearance in hectares;
- the amount cleared in the reporting period;
- the total amount cleared to date; and
- an estimated amount to be cleared in the next reporting period.

3.2.7 Rectification of Non-compliances

Where instances of noncompliance with either the environmental outcomes in the current approved PEPR or lease conditions have been noted in the compliance report, each noncompliance must state:

- date of the incident;
- state if the incident was a reportable incident under Regulation 87. If so, the report must also state the date the incident was initially reported to the Minister and the date the written report was provided to the Minister;
- what environmental outcome or lease condition was breached;
- if and how the noncompliance was, or is planned to be, rectified; and
- what measures, if any, will be taken to prevent recurrence.

Where non-compliances have previously been reported, in compliance reports (under Regulation 86) or incident reports (under Regulation 87) and not fully rectified at the time of reporting, a progress report must be included to assess the effectiveness of rectification.

3.2.8 Compliance with Leading Indicator Criteria

This section must summarise data relating to any leading indicator criteria approved in the PEPR. If any leading indicator criteria have been triggered, the report must state the actions that were taken and if the relevant control strategies continue to be effective.

3.2.9 Management System Audits

If an audit of any part of the operation management system was conducted during the reporting period, the following information on the audit must be included:

- when the audit was undertaken;
- who undertook the audit;
- what aspect(s) of the management system was/were audited;
- what issues, or recommendations for improvement, were noted;
- an assessment of the potential for any issues identified in the audit to lead to a non-compliance with approved environmental outcomes; and
- what corrective action has been, or will be, taken to address any issues.

3.2.10 Environment Protection and Biodiversity Conservation Act Reporting

If the lease or licence was the subject of an approval under the Commonwealth Environment Protection and Biodiversity Conservation Act 1999, a section must be included demonstrating compliance with all Environment Protection and Biodiversity Conservation Act approval conditions.

3.2.11 Adjacent Land Use

- summarise any changes to land use adjacent to the mining operation;
- where applicable, indicate the class of exempt land where mining activities were undertaken; and
- where applicable, provide a statement that all waivers for exempt land required for the current operation are in place in accordance with the Mining Act.

3.2.12 Complaints

- indicate how concerns or complaints raised by third parties were addressed.

3.3 Maps and Plans

If maps or plans are included in the report, these must conform to the following standards:

- be based on the Australian Height Datum (AHD);
- state the relevant datum (e.g. GDA94, WGS84);
- use metric units;
- include title, north arrow, scale bar, text and legend;
- state date prepared and author; and
- be of appropriate resolution and scale for represented information.

4. Submission of Reports

Two hard copies and an electronic version of the compliance report must be submitted; the information in all must be identical.

Each page, plan or other separate sheet must include the lease number(s), date of the compliance report preparation and sequential page numbering.

The electronic version must be submitted in either Acrobat PDF or Microsoft Word compatible files.
A single report may be submitted that reports on a group of leases and licences that are worked under a single approved PEPR.

Compliance reports can only be submitted by the tenement holder(s). Reports submitted by consultants or agents will not be accepted unless accompanied by a signed statement from the leaseholder endorsing the content.
