#### DISABILITY INCLUSION ACT 2018 (SA)

##### *State Disability Inclusion Plan*

I, MICHELLE LENSINK MLC, Minister for Human Services, to whom the *Disability Inclusion Act 2018 (SA)* (the Act) has been committed, hereby publish the State Disability Inclusion Plan pursuant to subsection 13(5) of the Act:

Dated: 28 October 2019

MICHELLE LENSINK MLC  
Minister for Human Services

## INCLUSIVE SA

*State Disability Inclusion Plan 2019–2023  
Government of South Australia***Acknowledgement of Country**

The South Australian Government acknowledges and respects Aboriginal people as the State's first people and recognises their traditional relationship with Country.

We acknowledge that the spiritual, social, cultural and economic practices of Aboriginal people come from their traditional lands and waters, and that the cultural and heritage beliefs, languages and laws are still of importance today.

**Minister's message**

I am proud to deliver South Australia's first State Disability Inclusion Plan – Inclusive SA – established as part of the *Disability Inclusion Act 2018 (SA)*.

South Australians living with disability and those in the service delivery sector have experienced their largest ever reforms with the recent full transition to the National Disability Insurance Scheme (NDIS). While around 30,000 people are now receiving supports, one in five report living with disability in South Australia, highlighting the importance of inclusion planning.

In this new era of disability service delivery, development of the state plan has provided the opportunity to consult with members of the community with lived experience, in order to learn more about how the State Government can foster inclusion and accessibility in new ways. I am grateful to the many hundreds of South Australians who contributed to the consultation process through forums, emails, phone calls and online discussions.

Inclusive SA paves the way for a whole-of-government approach to inclusion, and I look forward to continuing the team effort required to bring about the necessary changes. Inclusivity benefits all South Australians, and together with local councils and State Government agencies, we are committed to delivering the economic and social benefits of a more inclusive state.

MICHELLE LENSINK MLC  
Minister for Human Services

**Inclusive SA**

It is time for the State Government to lead by example and work to improve access and inclusion for people with disability. Inclusive SA is our commitment to create a more inclusive South Australia. It is our first State Disability Inclusion Plan and it will bring State Government agencies and local councils together to reduce the barriers faced by people living with disability.

In 2018, the *Disability Inclusion Act 2018 (SA)* was passed because we recognised that a stronger commitment was needed. This plan, and the Disability Access and Inclusion Plans (DAIPs) that State Government agencies and local councils will develop, will help ensure that new strategies address barriers and promote positive action.

Inclusive SA sets out specific actions for State Government agencies and local councils ('State authorities') to achieve. These will support the implementation of the *National Disability Strategy 2010–2020 (NDS)* and the principles agreed in the *United Nations Convention on the Rights of Persons with Disabilities (UNCRPD)*. Inclusive SA also complements the NDIS, as it aims to address access and inclusion for all South Australians living with disability, including people who are not NDIS participants.

While Inclusive SA sets the focus for the next four years, it is also a living document that will respond to shifting priorities and new information, as governments across Australia are working together to design a new national disability strategy for 2020 and beyond. Inclusive SA will also be updated to reflect social, political and environmental changes as well as any response to recommendations made by the Royal Commission into Violence, Abuse, Neglect and Exploitation of People with Disability. A revised plan will be published in 2021.

**Community consultation**

More than 300 enthusiastic people generated around one thousand ideas to help us develop Inclusive SA. The community shared examples of good practice and discussed where improvements could be made. People with lived experience of disability provided valuable input into the themes and priorities.

Working together, participants told us that people living with disability want to:

- be treated with respect and dignity
- find meaning in their lives
- make their own decisions
- be actively involved in their communities
- live somewhere that feels like home
- be able to get to places
- receive an education
- work
- feel safe
- have fun
- make friends
- be connected and informed
- understand their rights
- have access to the services they need.

Participants in the community consultation considered the specific situations of people from culturally and linguistically diverse backgrounds, Aboriginal and Torres Strait Islander peoples, women and children. The actions in this plan take those considerations into account. Further and more targeted consultation with these priority groups will take place during 2020 to ensure the revised plan in 2021 responds to their specific needs.

You can read more about what we heard during consultation in the consultation report found at [www.inclusive.sa.gov.au](http://www.inclusive.sa.gov.au)

**Principles**

Principles are values that guide behaviour and create a shared understanding about what is important. This plan is based on the following principles for people living with disability:

- fundamental human rights, responsibility and autonomy
- individual worth and dignity
- participation in social and economic life
- the right to realise physical, social, sexual, reproductive, emotional and intellectual capacities
- the right to make decisions, including supported decisions and to take risks
- access to information in appropriate forms

- respect for cultural or linguistic diversity, age, gender, sexual orientation and religious beliefs
- rights to privacy and confidentiality
- live free from neglect, abuse and exploitation
- rights to pursue complaints and access justice
- acknowledge and respect the crucial role of families, carers and significant persons

#### Quotes from the consultation

*"If you can get young people with disabilities used to being involved in decision-making, that would be a great step"*

*"Saying people were part of the discussion is not sufficient; the involvement must extend into the decision-making"*

### Accessible communities

The accessibility of the built environment, quality services and information is key to ensuring people living with disability are included and have the opportunity to equally participate in all aspects of community life. It is our aim to increase accessibility to public and community infrastructure, transport, services, information, sport and recreation and the greater community.

*Quotes from the consultation*

*“Educate the community about ABILITY”*

*“Everyone has different abilities. Make sure everyone has the opportunity to use their abilities”*

*Being inclusive — State Sports Park, Office for Recreation, Sport and Racing*

The development of the new wind tunnel facility at State Sports Park will provide world class training facilities for elite and developing athletes and para-athletes.

*Being inclusive — Glenthorne National Park, Department for Environment and Water*

The State Government is creating Glenthorne National Park in Adelaide’s southern suburbs. This new park is being developed using Universal Design principles and will be accessible and inclusive for the entire community. It will showcase the principles of Healthy Parks Healthy People – a partnership between the community, the Department for Environment and Water and Department for Health and Ageing that aims to improve our health and wellbeing through quality green space.

*Being inclusive — Accessible website solution offered to all South Australian Government agencies, Department of the Premier and Cabinet*

Audited by Vision Australia and user tested by Royal Society for the Blind (SA), Website Design System offers all South Australian Government agencies an accessible website solution through the Office for Digital Government, Department of the Premier and Cabinet. With increased accessibility as the reason for the development of government websites, Website Design System now provides agencies with a base website made up from over 30 modules built to the Web Content Accessibility Guidelines (WCAG AA). Each module is managed centrally. Upgrades and accessibility updates are developed, tested and deployed once at the top level. They then cascade to all sites. Supported by [South Australian Government’s Online Accessibility Toolkit](#), solutions like Website Design System are highly valuable for digital inclusion as it now means inclusion is part of the planning stages for digital resources. It is no longer a costly afterthought.

*Being inclusive — Disability Housing, SA Housing Authority*

The SA Housing Authority built 100 disability homes, many with bespoke designs to meet the specific needs of individual households. The disability housing, which was built to standards incorporating Universal Design and Liveable Housing Australia design guidelines, has now been completed and transferred to community housing providers to manage.

**Learning and employment**

Workforce participation is fundamental to social inclusion. It provides economic independence and choice, social connections and friendships, value, identity and belonging. It is our aim that people living with disability have access to inclusive places of study and that education and training provides pathways to meaningful and inclusive employment and volunteering opportunities.

*Key words*

Employment, education, volunteering, learning, training, ability, flexibility.

*‘I’ statements*

- I can make the most of my abilities
- I can contribute and know my contribution is valued
- I can have a fair go

*Priority 10: Better supports within educational and training settings*

## Actions

32. State education and training sectors to support inclusive education culture and practices.
33. State education authorities to work in partnership with children, students, parents or carers, industries and the community to provide curriculum and learning opportunities that are personalised and tailored to the individual, and prepare for life beyond school.
34. Determine data required to measure and track the percentage of people living with disability participating and achieving in education and training.

*Priority 11: Skill development through volunteering and support in navigating the pathway between learning and earning*

## Actions

35. Explore how pathways can be improved from education and training settings to post learning.
36. State authorities to facilitate meaningful volunteering opportunities for people living with disability.

*Priority 12: Improved access to employment opportunities and better support within workplaces*

## Actions

37. Support and promote the implementation of the Office of the Commissioner for Public Sector Employment's *Public Sector Employment Strategy* across the public sector.
38. Increase employment opportunities across all levels in the South Australian public sector through the targeting of job opportunities for people living with disability under section 65 of the *Public Sector Act 2009* (SA) which provides for employment opportunity programs.
39. Develop data measures to track the percentage of people living with disability employed and retained in State authorities.

*Quotes from the consultation*

*"Trust that we can do it"*

*"I want people living with disability to be given opportunities just like any other person in terms of education, employment, physical access, etc."*

*Being inclusive — Access for children on the autism spectrum, SA Museum*

Museums can be loud and overwhelming places for children on the autism spectrum. As part of the South Australian Museum's Building a Culture of Access Program, the museum has implemented autism-friendly family mornings. During these mornings, children on the autism spectrum can visit the museum with their families outside of regular opening hours. By making small adjustments within the museum, such as altering sound and light levels and setting up quiet spaces, a sensory-friendly experience is created, improving access for people with disability in the community.

**Ensuring Inclusive SA makes a difference**

We want Inclusive SA to generate meaningful change and we also recognise there is still a lot of work ahead.

Achieving our vision will take time, extensive collaboration and ongoing reflection. This is why consultation with the community will continue, giving us the opportunity to adapt to the evolving needs of people living with disability.

Over the next year, each State authority will be developing their own Disability Access and Inclusion Plans (DAIPs) and be responsible for reporting annually. To ensure synergy across local councils and State Government agencies each DAIP will align to the priority areas set out in Inclusive SA.

To map our progress, we will use an initial set of interim measures (Appendix 1), while we develop an outcomes framework that will align with the new national disability strategy for beyond 2020. We will also report on our progress each year.

- 8.6.1 that, in consequence of some unlawful act, the vehicle was not in the possession or control of the owner at the time of the alleged prescribed offence; or
  - 8.6.2 that the owner provided the complainant with a statutory declaration in accordance with an invitation under this clause.
- 8.7 The defence in sub-clause 8.6.2 does not apply if it is proved that the owner made the declaration knowing it to be false in a material particular.
- 8.8 If:
- 8.8.1 an expiation notice is given to a person named as the alleged driver in a statutory declaration under this sub-clause; or
  - 8.8.2 proceedings are commenced against a person named as the alleged driver in such a statutory declaration,
- the notice or information, as the case may be, must be accompanied by a notice setting out particulars of the statutory declaration that named the person as the alleged driver.
